## PORTERVILLE TO SPEND \$50,000 FOR WATER AND SCHOOLS

City Officials Plan for Bond Issue to Meet Needs for Improvements.

Church Decides Contested Votes at Ducor Valid; May Make Contest.

PORTERVILLE, Aug. 20.—In spite of the fact that during the last eight months there have been bond issues for the amount of \$100,000 for public works, the city officials are now planning upon an additional issue of \$50,000 of this amount, \$25,000 to be used in extensions of the water system and \$25,000 for additional

water system look to the installation of high pressure mains to serve the Main street business district and the extension of the smaller mains in order to serve the outlying districts which have recently been added to the city limits. Two new buildings will probably be erected for the schools, one to accommodate the primary grades, this being erected on the West side, and one for the accommodation of the grammar grades, which will be built at the head of Morton street on the present grounds of the grammar school.

Two complaints were made to Ernest O. Eardley, the Tulare County Humane Society officer, yesterday. Grant Weber, a Plano rancher, was arrested on Main street for having driven a horse to town unfit for work. Weber was cited to appear before the society tomorrow. The doctor ordered that the horse be retired from work and Weber was given a reprimand.

Yesterday afternoon a complaint was made to the officers that a Holstein bull, which had broken a leg in jumping a fence in the Plano district, had been allowed to be at the roadside for two days without food or water. The officers discovered that the owner of the animal was a Poplar Point, who was unable to speak English. He was taken to the hospital and his leg was set. He will be kept there until he is able to appear before Judge Gilmore.

Beginning September 27th, there is to be held in this city a convention of the laymen of the Congregational churches of California. The object of the gathering is to form a state Congregational Brotherhood, with which all the laymen of the state will be affiliated. When the state organization is accomplished, together with those of other of the coast states, there will be an attempt made to extend the brotherhood and make it national in scope. It has been stated that there will be present about 100 delegates, representing all of the leading Congregational churches in the state. A number of prominent ministers and laymen of the faith will be present to address the gathering.

Today there was received word that Judge Curtis D. Wilbur, candidate of the Lincoln-Roosevelt League for the office of associate judge, will be one of the prominent ones to address the meetings. According to the plans of the work as they have been outlined, there will be two sessions of the convention each day of the 27th, 28th, 29th and 30th. On Saturday, October 1st, it is planned to give the delegates a ride through the orange groves, and in the evening there will be a general reception. A large number of those present for the meetings will remain here for a union church service to be held in the auditorium of the church on Sunday, October 2nd. In addition to the interest in the work, which will be many visitors, there is no small interest in a visit to the Congregational church here, which is quite the finest of the very few institutional buildings in this state.

Word has been received here in a telegram that H. W. Duckham, who was arrested in Oakland for having run down and killed Mrs. C. Peterson, near San Pablo and Fifteenth streets, was exonerated by the coroner's jury called to investigate the case. The testimony showed conclusively that Duckham was not to blame in the accident. During the excitement incident in the accident, Mrs. Duckham, who was in the machine, lost or had stolen from her a valise containing several valuable articles of jewelry, a bank book and some trinkets of sentimental value.

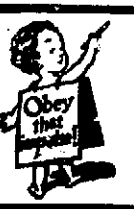

As a result of a recent fire at Nelson's camp in the mountains, a fire which was set through the carelessness of hunters and which remained undiscovered by the forest rangers for almost four hours, a number of changes have been made and more have been ordered in the ranger service. An inspector who had been sent out as a ranger, was discharged as a result of the blaze. Changes in the service which are contemplated will give the individual members of the force a much larger territory to cover and will require that more frequent reports be made to the supervisor. In order to facilitate this work, certain changes are being made in the telephone service which covers the forest.

Judge Church of Fresno, today sitting at the county seat in the election dispute which was returned from the Ducor precinct and which at one time, was thought, would invalidate the selection of E. M. Singleton as the candidate for supervisor in the fifth, today straightened out the tangle and the twenty-five votes from the precinct will be counted. The election officers were called into court, and upon oath they declared that tally sheets

## REEDLEY PEOPLE SEEK BETTER PROTECTION

Want to Vote on Proposed Fire Limit; Will Ask Supervisors.

REEDLEY, Aug. 20.—If the plans which were discussed and decided upon at a meeting of the Reedley Chamber of Commerce Thursday night are carried out, the city of Reedley will soon have adequate fire protection to cope with any ordinary fire.

The plan is to have the board of supervisors call a special election to vote on a proposed fire limit for Reedley. In order to present the matter before the county board it was necessary to get fifty signers to a petition asking the supervisors to order an election for the purpose of deciding the fire limits and whether or not the people are willing to pay the tax which will be necessary in order to purchase the supplies. When the election is called, the necessary number of signatures having already been secured, there will, in all probability, be a tax the first year of 1 per cent and the second and every year thereafter a tax of one-half of 1 per cent. It is planned to have the election called for some time in the near future.

Since the recent fire it has been realized more than ever before that Reedley needs better fire protection, and the business men are determined to win out in the matter of demanding better protection. If the election is carried, the six-inch water main which now reaches as far as the Reedley National Bank corner, will be extended two blocks south to the Grand Hotel and fire plugs put in every half block. It will be too expensive to extend the water mains all over the city, but it is planned to purchase an up-to-date chemical engine for use outside the city limits.

Miss Frances Lane and Miss Tina Suderman left for Berkeley on the midnight train last night where they will attend the state university. This is Miss Suderman's second year and she will continue her work for the A. B. degree. Miss Lane will be a Freshman and will take classical work leading to an A. B. degree.

W. E. Roeder of Fresno was in the city today on important business with the Reedley National Bank.

Taylor Jack left for Hot Springs Friday, where he will spend a few weeks with his mother who has been in the mountains all summer.

Fred Hanson, who was in Fresno for several days the first of the week, has returned home.

Edward Hanson, who has suffered for several years with a swelling of the face and underwent an operation in Fresno the first of the week and had his tonsils removed. He is getting along very well and feels greatly improved in health.

A. E. McClanahan of the Reedley Land and Loan Company, has returned home from San Francisco and Berkeley where he has been on business.

Dr. A. V. Acker and wife, who have been spending a month camping in the mountains, are expected home some time next week.

## MISS SHIELDS NEW Y. W. C. A. SECRETARY

Announcement was made last night that Miss Florence Shields of San Diego at once succeeds Miss Mary C. Baker as the general secretary of the Y. W. C. A. in this city. Miss Shields will be here temporarily, until a permanent secretary can be secured.

She is thought to be well fitted for the place, being a graduate of Chicago University, and also having had the benefit of the regular Y. W. C. A. training course in Los Angeles.

## MALAGA MATTERS

MALAGA, Aug. 20.—Mr. and Mrs. J. C. Fieldcamp have a little daughter which the stork left at their home on Monday.

Miss Esther Rouch of Clovis is visiting her cousin, Mary Carver, who has been visiting relatives in Selma.

Mr. and Mrs. A. C. West and little daughter of Coalinga are visiting Mrs. West's parents, Mr. and Mrs. W. E. Hughes.

Mr. George Reicht of Hobart Mills is visiting his sister, Mrs. John King.

Mr. and Mrs. C. A. West of Coalinga, who have been visiting relatives in Selma, are the guests of the latter's parents, Mr. and Mrs. Jonas Price.

H. W. La Rue, W. B. Hildreth and family and Mrs. Lowther, who have been spending the week at Capitola, returned home on Friday.

W. F. Tommer, who was called to Denver to see his mother, who was injured in an accident, returned home on Friday. His mother, who was on her way to the coast, was compelled by her accident to return to her home in Kansas.

A. B. Held of San Francisco was the guest of J. T. Niswander Saturday.

## S. VISMARA WILL NOT FACE A JURY

Italian Accused of Attempting to Wreck the Owl Train Is Released.

From Custody.

The charge of attempting to wreck a train which was recently placed against S. Vismara was yesterday dismissed by Judge Graham on motion of Deputy District Attorney Henry Hawson. Hawson informed the court that the evidence against Vismara was insufficient to warrant a conviction. The Italian confessed to the deputy district attorney that he saw a light across the Southern Pacific tracks near Firebaugh, and that he made an attempt to remove the obstruction before the arrival of the Owl. A track-walker found the light and removed it. He saw the Italian standing nearby and immediately accused him of placing the light across the tracks. The arrest followed. Vismara was released from the county jail yesterday afternoon.

## TWO BATTERY CASES DECIDED BY COURT

Ernest Fay Acquitted, While William Bowen, a Rancher, Is Fined \$50.

Judge Smith Away.

Ernest Fay, accused of having battered a neighbor in a heated argument over politics, was found not guilty by Judge Graham yesterday morning.

William Bowen, a rancher, was fined \$50 yesterday by Judge Graham for battery. Bowen was found guilty by the court and the fine resulted. The money was paid. Bowen battered a neighbor living west of town in an altercation over a cow.

Justice of the Peace Smith left for Monterey yesterday morning to be absent two weeks on a vacation. Police Judge Briggs will be acting justice of the peace during Judge Smith's absence from the city.

## CIGAR DEALER PARRISH IN TROUBLE WITH LAW

Flourishes Automatic Gun Near Santa Fe Depot; Lands in Jail.

For the fourth time in the past year, A. H. Parrish, a local manufacturer of cigars, is in trouble with the law. At 3 o'clock yesterday morning, Parrish was taken into custody at the Santa Fe depot by Patrolmen Davis and Helms. He was lodged in jail for the night and was brought before Police Judge Briggs yesterday morning. During the arraignment, Parrish requested that he be allowed to consult with an attorney, in the meantime withholding a plea. The request was granted. Two charges were lodged against the cigar maker, one for carrying a concealed weapon, the other carrying a concealed revolver. A large automatic revolver was found in Parrish's possession by the arresting officers. A bag of loaded shells was also found in his pocket.

The officers answered a hurry-up call from the Santa Fe depot at 2:45 yesterday morning. Riding in the depot on their bicycles, the patrolmen found Parrish flourishing his big gun and shouting in loud tones. When he saw the officers approaching, Parrish placed the revolver in his pocket. After relieving him of his gun, Helms and Davis led Parrish to jail. It was with some difficulty that Parrish was lodged behind the bars. He fought the officers for awhile and then appeared to be in such a drunken condition that the policemen had to hold him from falling to the pavement.

Parrish was a candidate for city trustee at the last city election but was beaten for the nomination. Last August he was arrested in a street saloon by Patrolmen Davis and Machen. Parrish entered the place in an intoxicated condition and drawing a large automatic revolver held up a dozen or more men who were in the barroom. Parrish threatened to kill them and forced the officer to make him escape through the front door. Davis entered by the rear door and grabbing Parrish from behind, relieved him of his gun. Parrish was found guilty in the superior court, where he paid a fine of \$75.

## REV. MILLER BACK FROM CONVENTION

Chosen Member of Official Body of Church to Represent This Valley.

After six weeks spent at Santa Cruz, Rev. and Mrs. Ray C. Miller have returned to Fresno. While absent Mr. Miller preached three Sunday days, giving one of the principal addresses at the Santa Cruz convention and supplying the pulpit of the First Church San Francisco the other two days. Mr. Miller was honored by being elected to the State Board, which is the only official body in the state. He will represent the twenty congregations in the San Joaquin Valley. Today Rev. Miller will fill his own pulpit at 10:45, preaching on "The Religion of Today and Tomorrow."

## On The Way

## 1911 Chalmers "30"

Will positively be in Fresno Wednesday, Aug. 24.

## The Car You Know Is Right

It was right in 1909, better in 1910 and brought to the last degree of perfection for 1911. You know this, or at least you ought to, if you are buying a car.

BUT if you are going to buy a Chalmers, remember this: It is necessary to order ahead. At no time within the past year and a half has delivery on CHALMERS caught up with the demand. Last season many were disappointed because they could not get a CHALMERS, and were forced to take a second choice. We deplore this condition. We hate to see anyone disappointed when they want our car, but you can avoid this disappointment by ordering early. And of this you can rest assured: Once you get a Chalmers you will be satisfied. If you don't believe it, try and buy one second-hand.

Better come in and see the new car next Wednesday anyway.

## EXTERMINATING TICKS BY VACATING PASTURES

A Pasture May be Freed of Ticks by Keeping All Stock Off of it from September 1st to July 1st.

The month of August lends itself well to the eradication of cattle fever ticks where a pasture rotation plan is used. By vacating a pasture during this month and keeping it vacant until July 1st of next year it may be freed of ticks, and if no tick-infested animals are allowed to enter after July 1st the pasture will remain free. The United States Department of Agriculture advises farmers in the tick region to take advantage of this favorable time so far as practicable.

Pastures from which live stock are removed for a sufficient time become free of ticks by a process of starvation as the ticks cannot live to maturity if they are unable to get upon animals. The time required for all ticks to die after the stock has been removed from infested fields and pastures varies considerably, depending on climate, season, and weather conditions. Experience has shown, however, that the period from September 1st to July 1st is sufficient, and this appears to be the most convenient time.

The advantage of vacating a pasture for the period named is twofold. Not only is the pasture freed from ticks, but its disuse during that time will probably cause less inconvenience and expense than at any other season, and it will be benefited by the rest and will have a better growth of grass the following summer. In some sections where pastures are utilized throughout the winter, to vacate would probably necessitate feeding the stock, unless the farmer is situated so that he can keep his stock on one pasture while another pasture is kept vacant. But it is also true that beginning with September there will be a more abundant supply of rough feed about a farm which can be utilized. August is a most favorable month for making a start toward freeing premises of ticks by the method suggested.

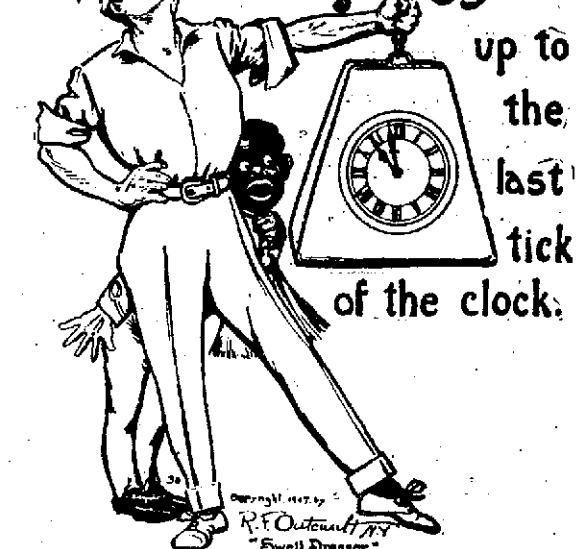

The animals should, of course, be free of ticks when they are again turned on the pasture in July. Where the owner has a small number of cattle, grazing or spraying them with Beaumont crude petroleum is a good way to rid them of ticks. When the number of cattle is large or when a dipping vat is convenient it may be more practicable to dip them.

Full information as to how to get rid of the ticks, including directions for the preparation of dips and sprays, may be obtained free upon application to the Bureau of Animal Industry, Department of Agriculture, Washington, D. C.

**CARD OF THANKS.**  
The family of Louis Serrault, who was killed in the railroad accident at Malaga, wish to extend their heartfelt thanks to the friends who so kindly assisted them in the terrible hour of bereavement. Especially do they thank the McHenry Company.

### SECTIONALISM

Northern California ought to be ashamed of the narrow margin by which it is now evident that A. J. Wallace has been nominated for Lieutenant Governor. We have charged Southern California with provincialism, but the result of the election shows that it is Northern California that is guilty of it. This, of course, does not apply to Fresno county, which gave Wallace a big majority. Phil Stanton, a very popular resident of Los Angeles, made the fight for governor on the sectional issue, and was snuffed under by the vote of his own friends, in his own town. For a state principle, Southern California disregarded sectionalism, and supported a San Franciscan for governor. But on the same sectional issue, Northern California voted against A. J. Wallace, a man whose interests (they are large) are nearly all in the North, though his residence is in the South, a man of large caliber, sound judgment, and tested public spirit, who was running unopposed for an office which could bring him no additional personal honor, for the sole purpose of rendering an important public service. And on that same sectional issue Northern California preferred to him Francis J. Keeling, a good fellow, nearly unknown, of affiliations unspecified, who frankly acknowledged that he was in the race for its personal advantage to himself. This is saying nothing against Mr. Keeling, who is a good fellow, and who, with the assistance of one of the brightest advertising men on the coast, made a remarkable printers' ink campaign. But between the two men, as between the principles and purposes they represented, there was no comparison whatever, and the vote of Northern California, on this office simply represented a sectionalism which Southern California, at the same election, did not manifest. Now let Northern California make amends. When the election in November comes, let Northern California roll up so huge a majority for Lieutenant Governor Wallace that the returns will constitute a message of unity to Southern California and a vindication of the sectional patriotism of the North. Incidentally, let Northern California contribute to the election of the Lieutenant Governor, whose services are imperatively needed, to organize the State Senate in the interest of the progressive policies of the Johnson administration.

Southern California has outsiders in its enterprise, in progress, and in the niceties of civilization. This we have conceded, but we have claimed to surpass the South in Californianism. Let us render a vote that will make good that claim.

### WORKS

It is evident that John D. Works has received the endorsement of a plurality of the Republican voters of California for United States Senator. It is probable that he has received the segregated endorsement of the majority of the districts which will elect Republicans, under the freak provision of the direct primary law devised for the fancied benefit of Senator Frank P. Flint. At any rate, legislators have the right to adhere to the instructions of their own districts, unless there is a state-wide endorsement to which they have a moral and legal right to yield, and it is a moral fact that Judge Works is now the Republican candidate for United States Senator. His only serious opponent is an imported Chicago millionaire, who is only technically a Californian, and whose sole public asset is his record as a ball player and a well advertised name. Sunny Jim Spauldine or Unedda Grapefruit could probably have got a substantial vote, on the same basis, and John L. Sullivan (who is, for the moment, an "inhabitant" of California, and therefore technically eligible) could therefore have carried a number of districts with a whoop. But Archery Golf Spauldine has no more right to be Senator from California than the comestically excellent products of his Chicago factory have to be set up in our churches, as objects of worship. The terms are simply incommensurable.

Doubleless Mr. Spauldine (who is a good sport and a sensible fellow, though not the stuff that Senators should be made of) understands this as well as anybody. He refused to take his original candidacy seriously until he was literally dragged into it by the persons who, for motives of their own, managed his campaign. Left to himself, he would retire from a fight which he never willingly entered. But Mr. Spauldine is a millionaire, and if he can be induced to let go of the coin there will be plenty of energetic volunteers anxious to expend it in "doing up" members of the legislature to vote for him. We hope it will not be tried, but in any case it ought not to be permitted to succeed. The best way to prevent it will be for the people of each district to watch their own prospective legislator for any symptoms of going over. Let each legislative candidate give his constituents plainly to understand that he accepts the expressed will of the people of California, and will vote for Judge John D. Works, of Los Angeles, Republican nominee for United States Senator.

### THE SICKLE

The public reputation of Speaker Cannon by Congressman Longworth means of course the definite decree that Cannon must go. It was already evident enough that no power on earth could save Cannon the speakership. Either the Republican party had to repudiate him or the people would provide enough Democrats to do so. But, in the absence of a Republican caucus, it was difficult to get any authorized assurance of his deposition by Republican forces. Individual Republican candidates could assure their constituents of their own intention to vote against Cannon, but there was no way to collect and collate these promises, most of which, indeed, with the congressional campaign not yet actively opened, have not even been made. But Congressman Longworth's announcement "breaks the ice," and serves as a semi-official opening. Longworth is peculiarly close to both the Taft and Roosevelt dynasties. He was the organ of both these dynasties (mind, we say "both") in advising against the precipitation of a fight against Cannon last time. He represents the policy then formulated by both in advising for it this time. And, under the present unwritten constitution of the United States, whoever speaks for the executive department of the government thereby speaks with authority for the legislative department. Therefore, it is decreed and officially announced that Cannon must go.

It is the inexorable necessity of an unlikely fate. Against Uncle Joe Cannon personally, no man who knows him can have a harsh feeling. He is simply an anachronism—the outgrowth of a former era, which must be swept aside by the course of progress. It is the Reaper, coming in less kindly guise than that of death. Without rancor, but without swerving, the sickle must be swung to make way for the new growth of Progressive Republicanism.

### SOME STATE OFFICES ARE STILL IN DOUBT

**Shannon Claims to Have Beaten Richardson for State Printer.**

SAN FRANCISCO, Aug. 20.—With the continuing of the official canvass today and the securing of late returns from remote districts, indications are that the Lincoln-Roosevelt League elected its entire ticket. The offices still in doubt are those of lieutenant governor, secretary of state, state printer and clerk of the Supreme Court. A. J. Wallace declared today that from returns secured by telegram from county clerks he has won the nomination for lieutenant governor by 2,000 votes over Francis T. Keeling.

It was asserted positively by league leaders that Florence J. O'Brien had defeated Frank C. Jordan for the nomination for secretary of state and Friend Richardson had a lead of 4,800 votes over "Bully" Grant Taylor, insurgent, but "defeated" William H. Bannister for clerk of the Supreme Court. Jordan still claims a victory and Keeling will accept only the figures of the official count before admitting defeat. In the returns so far received Jordan leads O'Brien, but it is asserted that the districts yet to be heard from are insurgent.

Figures obtainable at 10 o'clock tonight support the claim of W. W. Shannon that he has defeated Friend W. Richardson for the nomination for state printer. There were six counties to be heard from when the totals showed a lead of 246 votes for Shannon.

### NITRIC ACID BOMB WRECKS A FACTORY

**Supposed to Be Result of Trouble With the Employees.**

OAKLAND, Cal., Aug. 20.—A nitric acid bomb tonight wrecked the sash and door factory building of the Pacific Coast Mill and Lumber Company located at Second and Grove streets. Tonight's explosion is the second to occur in the past year.

George Bowers, and F. J. Gardner, night watchmen, narrowly escaped with their lives.

Manager L. K. Kendall of the company, has had considerable trouble with employees of late. A short time ago an attempt was made to burn the building.

### CASE OF CHOLERA ON PACIFIC LINER

YOKAHAMA, Aug. 20.—The Pacific Mail steamer Hienia from Hongkong to San Francisco, was detained in quarantine here upon arrival on account of a case of Asiatic cholera. A steamer sailed after undergoing disinfection.

### MISS GOULD'S CHAUFFEUR PASSED BEST EXAMINATION

ALBANY, N. Y., Aug. 20.—The state of New York has given Thomas J. Langston of Irvington-on-the-Hudson a rating of 100 per cent in his examination for a chauffeur's license under the Cullen automobile law. He is the first chauffeur to achieve this honor.

Langston is chauffeur for Miss Helen Gould and owns three of the latest automobiles more than five hundred thousand miles, the distance record, as far as chauffeurs examined in this state are concerned. Langston has been in the employ of Miss Gould eleven years and has covered 350,000 miles in this state during that time.

### BIG FIRE IN BUENOS AIRES

BUENOS AIRES, Aug. 20.—A big fire in the business district during the night destroyed a great department store known as the City of London. The loss is estimated at several million dollars.

### SHERMAN MAY GIVE WAY TO ROOSEVELT

**Latter Denies He Has Asked Taft to Break With Vice President.**

CYSTER HAY, Aug. 20.—Theodore Roosevelt denied today that he had sent an ultimatum to President Taft demanding that the President break with Vice-President Sherman.

Colonel Roosevelt's attention was called to a report that Lloyd C. Gibson, chairman of the New York Republican committee, was to go to the summer White House next week to "carry the terms of peace between Beverly and Sagamore Hill."

The report had it that Sherman was chiefly responsible for the action of the state committee in refusing to select Colonel Roosevelt as temporary chairman of the New York state Republican convention and selecting the vice-president instead.

"I have sent no ultimatum to President Taft. The report is a tissue of falsehood from beginning to end," said the colonel.

The colonel added that he had not sent Gibson any message in that city on any mission. He made it clear that he had no intention of doing so, and repudiated no situation which would call for such a step.

NEW YORK, Aug. 20.—Republican leaders here heard today the report that Vice-President Sherman might announce, in the interest of harmony, that he did not fully understand the position in which he was placed when he let his name go before the New York state committee for temporary chairman of the state convention and that he would retire in order that Colonel Roosevelt might have the unanimous vote of the convention for the temporary chairmanship.

### SPECIAL SESSION SEEMS CERTAIN

**Governor Will Ask Legislators to Vote Fair Bonds.**

SACRAMENTO, Aug. 20.—It was unofficially stated today that Governor Gillett plans on Monday to call a special session of the legislature to meet on September 7th to consider the proposition to have the state bonded for \$5,000,000, the money to be used in securing the Panama-Pacific exposition in 1915 for San Francisco.

### MORE CENSUS REPORTS.

WASHINGTON, Aug. 20.—The population of St. Louis is 687,028, an increase of 111,791, or 19.4 per cent as compared with 575,238 in 1900.

WASHINGTON, Aug. 20.—The population of Atlanta, Ga., is 154,829, an increase of 44,567, or 29.4 per cent as compared with 110,262 in 1900.

WASHINGTON, Aug. 20.—The population of Waterbury, Conn., is 73,141, an increase of 27,832, or 38.1 per cent, as compared with 45,309 in 1900.

### GAYNOR GAINS RAPIDLY.

NEW YORK, Aug. 20.—Mayor Gaynor came one step nearer recovery today. His physicians predict that within a week or ten days he will be out of the hospital fully recovered from the wound inflicted by James J. Gallagher. The following bulletin was issued at 9 o'clock tonight:

"The mayor is gaining rapidly in strength."

### SMITH NOT FOR CANNON.

DES MOINES, Aug. 20.—In a statement made to the Register and Ledger today, Walter L. Smith, congressman from the Ninth district, declares that he does not favor the re-election of Speaker Cannon.

Congressman Smith gives as his reason the fact that his district announced and endorsed his own candidacy to the speakership at the Republican state convention.

### A GOOD HABIT TO CULTIVATE.

There is a tremendous power in the habit of optimism, the conviction that we shall realize our ambitions, that our dreams shall come true, says Orison Swett Marden, in "Success Magazine." There is no uplifting habit like that of carrying an expectant, hopeful attitude, of believing that our heart yearnings will be matched by the facts of life, that things are going to turn out well and not ill; that we are going to succeed; that no matter what may or may not happen we are going to be happy.

There is nothing else so helpful as the carrying of this optimistic, expectant attitude—the attitude which always looks for and expects the best, the highest, the happiest—and never allowing oneself to get into the pessimistic, discouraged mood.

Believe with all your heart that you will do what you were made to do. Never for an instant harbor a doubt of it. Drive it out. Enter it into the friend thoughts or ideals of the thing you are bound to achieve. Reject all thought enemies, all discouraging moods—everything which would even suggest failure or unhappiness.

### INTERESTING NEWS ABOUT KANSAS.

The people of Kansas will be interested to learn that their state lies in a belt of high plateau land east of the Rocky Mountains, where the absence of rain makes grain growing unprofitable; that the land is devoted to grazing sometimes in fenced fields, but often in great open prairie watched over by cowboys. The information may be relied upon absolutely, as it is found in school geography compiled by a man from New England, which, as every one knows, is all clogged up with culture and information.

We only hope that when the New England geography maker takes his much-needed trip to Kansas the people of the state will be too busy taking care of their eight million-acre corn patch and their six million-acre wheat field to do him violence.—"Success Magazine."

### PAWN AND HUNTING DOG LIE DOWN TOGETHER

During a "cold snap" at the Summit on the Bequinnall and Nantahala Hallways, twenty miles from Victoria, British Columbia, on February 14th last, a fawn of the last season, sought shelter in the lee of the railway water-tank, which, owing to the constantly dripping water, was scarcely a comfortable refuge. Exhaustion and the cold proved too much for the youngster, and he was found frozen dead. A hunting dog, its natural enemy, was found curled up beside the deer, they having apparently sought warmth in mutual companionship. The dog was living, and has been completely recovered. September 15th World Magazine.

## CALIFORNIA PAPERS ON JOHNSON'S VICTORY

### THE PEOPLE'S CHOICE

The Redlands Review favored the nomination of Anderson for governor. It is now for Johnson. In its issue of August 15th it says:

"The nomination of Hiram W. Johnson was a foregone conclusion before the real campaign was a month old. Mr. Johnson got the lead on his regular opponents, took the bit between his teeth, forced the fighting, and really placed his competitors on the defensive. Mr. Johnson's appeal to the voters was direct, definite and forceful. He had a message, he delivered it with all the force of a man who felt every word he uttered, and with the persuasiveness of a real orator. The voters listened to his message eagerly and responded to his appeal enthusiastically. He was nominated. He will be elected. A man of his commanding ability, whose integrity and honesty of purpose can not be

### JOHNSON A NATIONAL FIGURE

—SAN JOSE MERCURY

The hundreds of letters and dispatches being received by Hiram Johnson from distinguished public men in the East show that he is not only a state but a national figure. When the results from Kansas and Iowa showing insurgent victories were published, the effect upon the country was considerable but not extraordinary owing to the fact that insurgency is always expected in the Middle West. California, however, has never been regarded as an insurgent state. It has so long been the chancel of what is known as the machine, or corporation, that other states looked upon us as so many helpless slaves. Now the state is redeemed. The direct primary has given the people their first opportunity to name their own candidates for office. In other words, given the freedom they proceeded to convince the world that they had the same measure of patriotism as the people of other states, and that the

### DAY OF REJOICING FOR CALIFORNIA

—LOS ANGELES EXPRESS.

Free and triumphant, insurgent California sends greetings to the nation. Redeemed from long continued political tyranny, achieving the control of its own affairs for the first time in its history, the Republican party of this state becomes self-governing and independent.

The handouts of Southern Pacific servitude have been flung off. The railroads are no longer the despots of the state. The shackles that made the Republican party a slave to the wicked, tyrannical and corrupt government of the railroad machine have been broken and forever cast aside.

Never again will the state of California be a slave to the inventories of Southern Pacific chattels as a piece of railroad property. Never again will the Republican party of this state sink to the degradations it has endured for more than thirty years.

The rule of the railroads and the railroad machine is over. Their day of political despotism is ended. Indignant insurgency has flung them from their places of power. California has been gloriously redeemed and the Republican party has restored sovereignty to the state and self-government to the people. Independence, long lost, has been regained. The long black night of

### IN THE LODGE ROOM

REBEKAHS.

Fresno Rebekah lodge, No. 158, held a well attended meeting last evening. Mrs. Barney Martin was elected to membership by transfer card. A letter was received from the president of the Rebekah assembly requesting all Rebekah lodges observe the fifty-ninth anniversary of Rebekah Odd Fellowship, which falls on the 30th day of September, by giving entertainment for the benefit of the Orphans' Home.

It was decided by ballot to give an entertainment and social on the evening of the 24th of September, the proceeds to be devoted to the Orphans' Home and a committee consisting of Mrs. Joe Fine, Mrs. W. H. Benson and Miss Ann Brucker was appointed to take full charge.

A fine set of banners, which the lodge recently purchased, was received and displayed, and accepted by the lodge.

### PERSONAL MENTION

R. H. Phillips of Laton is stopping at the Grand Central.

J. C. McCann of Firebaugh is a guest at the Fulton.

Mr. and Mrs. A. V. Rowe and their son, A. V. Rowe, Jr., returned yesterday from an outing at Santa Cruz.

F. G. Ostrander of Merced is a guest at the Grand Central.

J. J. McHugh of Bradford, Pa., is among the late arrivals at the Hughes.

S. Kana and G. J. Ymato, two prominent Japanese merchants of San Francisco, are registered at the Hughes. They have come here to look over the local situation.

Mr. and Mrs. R. C. Williams of San Francisco are stopping at the Sequoia.

G. M. Anderson of Los Angeles is registered at the Sequoia.

Paul Hutzler of Marietta is stopping at the Grand Central.

H. D. Wells of San Francisco is a guest at the Sequoia.

Joe Sunderland, a prominent cigar manufacturer of Los Angeles, is at the Hughes.

L. B. Morris of San Francisco is stopping at the Hughes.

### Optical Goods

Our optical department is equipped with everything that is needed to give you the most efficient service and we make a point of seeing that our prices are if anything the lowest for equal value received, and the management of this department is personally reliable and efficient.

### THE WARNER CO.

Opticians and Jewelers,  
 1929-1931 MARIPOSA ST.

## THERE IS REAL SAFETY IF YOUR MONEY IS IN THE BANK

### THIS MAY HAPPEN AGAIN

The bank is the easiest place to keep your money. A bank loans no money without "tight-edge" security. A bank is not in business to "go broke," because the bankers would then FIRST lose all of their money.

Make OUR Bank YOUR Bank.

We pay liberal interest consistent with safety — 4 per cent.

## PACKERS TO PURCHASE DRIED FRUIT EXHIBIT

Will Pay Market Price for  
Everything Shown at  
County Fair.

In order to stimulate interest in the exhibition of raisins, peaches and figs at the coming county fair, the Fresno Agricultural Association has introduced a novel scheme which it is believed will result in an overwhelming number of exhibitors.

The Fresno Home Packing Company will purchase all the raisins placed on exhibit at the fair by growers, paying the market price for them. Raisins will only be exhibited in 500 pound lots. To the exhibitor winning first prize for the best exhibit of merchantable goods, the Fresno Home will pay double the market price for the goods. To the second best exhibitor, one and one-half the market price will be paid and the winner of third place will be given one and one-quarter the market price. All the remaining exhibitors will be paid the straight market price for their goods.

The Giffen-Hobbs Company will purchase all the dried peaches exhibited at the fair, in 500 pound lots and the same offer to prize winners will be made as was made by the Fresno Home for the best raisin exhibits.

The Toomey Fruit Company will buy all the dried figs placed on exhibit at the fair, with the same prize offers to winners. Exhibits of figs will be made in 100 lots.

**THAT SOUR STOMACH**  
Can be cured with M. A. C. which never fails to give results. Only at Smith Bros. Drug Store.

## FRESNANS ENTERTAIN AT SILVER WEDDING

Mr. and Mrs. Robinson Have  
Guests From Many California Towns.

Mr. and Mrs. W. S. Robinson of this city entertained last night at a silver wedding, guests from Fresno and Kings counties and Southern California being present at a thoroughly delightful dinner, served at 7 o'clock last evening at the Robinson home, O and Tulare streets. Thirty covers were laid.

Besides the host and hostess the following were present as guests: Mr. and Mrs. Joseph Kleffer, Mrs. W. H. Schuyler of Santa Barbara, Mr. and Mrs. William Hoffman of Oxnard, Mr. and Mrs. U. S. Bock of Sanger, Mr. and Mrs. G. W. Clark, Mr. and Mrs. A. A. Smith, Mr. and Mrs. Arch Caughell, Mr. and Mrs. J. Butler, Mrs. E. Hoover, Mrs. P. Hoover, Mrs. H. L. Ward of Linton, Mrs. William Frame of Hanford, Dr. G. H. Phillips of Hanford, Robert Phillips and Miss Phillips of Linton, Miss Florence Hickey, Miss Beall, Roy Kleffer, Frank Bates, A. Skoogard, I. Gibson, J. Bennefield, Grant Howard, Ross Russell, Rowena Bock, and Edna Bock.

Mr. and Mrs. Robinson expect shortly to leave on an extended Eastern trip to Mr. Robinson's former home in Illinois, it being forty years since he left there to make his home in California, during which time he has not been back.

## UNDERWRITERS WILL ADVISE COALINGANS

Representative to Discuss  
Means of Better Protection From Fire.

COALINGA, Aug. 20.—Mayor May has been appointed to interview the fire underwriters of San Francisco for the purpose of having a special agent come here and look into the matter of fire protection, so the trustees can arrange to meet the requirements and not have to submit to an increased rate. That has been successful is shown by the receipt of the following telegram by Trustee Phelps today:

"H. B. Matthews, of underwriters, will arrive on the 9:15 Monday. Notify Boland and Peeler and give him all the information you can. They were very nice and offer to help us in any way they can."

"A. P. MAY."

Harry Bender, the lineman who was seriously burned when he came in contact with 5500 volts of electricity yesterday, is not improved today. It was first reported that the man would undoubtedly recover, but when seen today by Dr. Warren, who is attending him, stated that Bender's chance of surviving the terrible accident is very slim. Warren intends to amputate the unfortunate's left arm, which was burned from the finger tip to the shoulder, at the latter joint. His right shoulder, which was also badly burned, would heal very readily, while the left arm is entirely dead.

## BRIDGES INTERRUPT CANVASS OF VOTES

MADERA, Aug. 20.—The supervisors returned last night from North Fork, where they went to inspect the bridges recently built there. They began the work of canvassing the election returns where they left off yesterday and were making good progress. The canvass will be completed Monday.

Mrs. C. A. Wolf of Zebs yesterday evening swore to a complaint charging Theodore Alvise, a butcher in Crane valley, who supplies meat to the camps of the San Joaquin Power Company, with grand larceny. She alleges that on the 20th of July, Alvise butchered a steer belonging to her. Constable Lewis left last night for Crane valley to serve the warrant.

D. B. Fowler, who was beaten for the Republican nomination for supervisor of this district by two votes, will probably contest the election of W. H. Thomas.

## STATES GET MONEY TO SUPPORT MILITIA

California Is Among Those  
to Receive More Than  
\$25,000.

WASHINGTON, Aug. 20.—Every state and territory in the Union with the right of Nevada, which is without a militia, gets a portion of the federal appropriation for the purchase of supplies and ammunition for the organized militia during the present fiscal year in the first allotment of \$1,500,000 war fund. The department has received about \$40,000 of the fund for emergency use.

According to the allotment which was made according to the enlisted strength of the organized militia in the various states, five states get more than \$50,000 each. Of these New York leads with \$208,000; Pennsylvania follows with \$140,000; Illinois with \$84,000; Massachusetts with \$78,000; Ohio with \$73,000 and New Jersey with \$54,000. Of the others, Alabama, California, Connecticut, Georgia, Indiana, Iowa, Kentucky, Maryland, Michigan, Minnesota, Missouri, North Carolina, South Carolina, Tennessee, Virginia and Wisconsin get each more than \$25,000. Utah ends the list with only \$4,478, while Delaware, Hawaii, Idaho, North Dakota and Wyoming are the only others to get less than \$10,000.

The department has allotted \$2,000,000 to the states and territories, on a basis of representation in Congress, for arms, equipment, camp purposes and promotion of rifle practice in the militia organizations.

## SMITH APPRECIATES DOUBLE NOMINATION

A. B. Smith, our popular tax collector, was feeling good and in talkative mood last evening.

To a Republican representative he said:

"I hope to be able to personally thank all my friends, both Republicans and Democrats, for the splendid endorsement given me and my administration of the tax collector's office."

"At the same time, whether I shall be able to see them all or not, they may rest assured that the compliment of so large a vote by my own party carrying the nomination, together with the nomination by the Democrats, is heartily appreciated."

"I have administered the office of tax collector of this county without fear or favor and to the very best of my ability, and this practically unanimous endorsement by the voters is a matter to me of both pride and gratitude."

## GERMAN ROYALTY AT POLISH PALACE

POSEN, Aug. 20.—Emperor William, the Empress, Crown Prince Friedrich Wilhelm and Crown Princess Cecilie, Prince Eitel Friedrich and the young members of the imperial family arrived here today for a house-warming of the new royal residence. The festivities will last three days.

The palace, the residence owned by the emperor, to maintain which he recently sold two of his smaller country places, has been built, for reasons of state, to symbolize to the Poles the Prussian supremacy in German Poland. It has been situated by the emperor as the permanent residence of Prince Eitel Friedrich, his second son.

It is a massive structure, built at a cost of \$1,338,000, covers nearly an acre and a half and contains more than 600 rooms. Among these the great ball room, surpassing in size and brilliancy of decoration any room of the kind in Germany, being a fifth larger than the famous white hall in the imperial castle in Berlin. Its walls are paneled and richly carved in marble.

A tower 240 feet high surmounts the chapel, which is exquisitely decorated with mosaics executed by Prof. August Oetelien of the imperial technical school at Charlottenburg. The emperor William will personally conduct divine services when in residence here, as is his custom.

## IMMIGRATION LAWS TO BE BETTER ENFORCED

Entry of Russian Jews at  
Galveston Is Cause of  
Inquiry.

WASHINGTON, Aug. 20.—The entry of Russian Jew immigrants at the port of Galveston, Texas, will be regulated more closely in the future. Department of Commerce and Labor officials reached this decision today after investigation which convinced them that the laws had been loosely enforced. Not long ago conditions were found there which led to the discharge of one inspector.

The latest immigrants arrived last Wednesday. The action of department officials in refusing admission to the 100 Jewish immigrants on board has been the subject of protest.

While the department disavows any intention to discriminate against that class of immigrants, Assistant Secretary Cable is determined that the immigration standards at Galveston shall come up to those required at other ports.

**RUSSIAN REFUGEE  
WILL BE DEPORTED**

SAN DIEGO, Aug. 20.—Alexand Miklin, alias Francisco Mijlin, alias Francisco Corrales, now in jail on a charge of burglary and assault with a deadly weapon, is a Russian, who, according to United States immigration officials today, escaped from them on a dock in this city several nights ago while the officers were waiting to deport him on a steamer bound for Eneadada, L. C. He was arrested last Wednesday night by a policeman who found him fighting with a negro. The immigration officers were warned by officials at Nogales, Arizona, to be on the watch for him and if he succeeded in clearing himself of charges now pending the deportation order will be immediately executed.

**FATAL STROKE ON STREET.**  
OAKLAND, Aug. 20.—H. B. Bruner, treasurer for the White-Wallace Company of this city, was stricken with heart failure this morning as he was on his way from the postoffice to his place of business. He staggered into a nearby cafe and became unconscious. An ambulance was summoned and Bruner died in it on his way to the receiving hospital. He was prominent in Masonry and leaves a wife and young son.

## OLNEY ELECTED TO SANTA BARBARA HIGH

Former Fresno Principal  
Will Remove to the  
Southern City.

A. C. Olney, for the past ten years principal of the Fresno High school, leaves next Tuesday, with his family, for Santa Barbara, where Mr. Olney has accepted the position of principal of the Santa Barbara High school. Mr. Olney was offered numerous positions in various parts of the state, including the principalship of a new high school in Los Angeles, but accepted the Santa Barbara position as the most desirable.

Mr. Olney has the reputation among the teachers and educational leaders of California as being one of the most capable and successful teachers and most tactful school managers in the state. His many friends among the graduates of the Fresno High school and in the community generally will greatly regret his departure, but will congratulate Santa Barbara on a valuable acquisition.

## CANVASS OF VOTES IS TEDIOUS TASK

The work of canvassing the vote cast at the primary election last Tuesday was started in earnest yesterday by the board of supervisors and occupied the attention of the members of the board all yesterday morning.

The board scarcely more than made a good start, however, owing to the untoward nature of the vote. When adjournment was taken yesterday noon, it was decided to work night and day this week until the count is completed.

## TULARE COUNTY IS STRONG INSURGENT

VISALIA, Aug. 20.—Complete returns from Tulare county, with the exception of one small precinct, show that the insurgent candidates for nomination on the state ticket were given handsome pluralities in every instance and in several instances the insurgent candidates were given a majority vote over the entire opposition. Hiram Johnson ran stronger than any of the others as he did in all other parts of the state, but majority votes were tendered A. J. Wallace, R. Grant Taylor and John D. Works. Johnson polled the highest vote of any of the insurgent candidates.

## PRINCELY CONVICT TO BECOME FARMER

HANOVER, Aug. 20.—Prince Frederick of Arenburg, who was condemned to death by a court martial in German Southwest Africa in 1899 for murder and other crimes committed against the natives, but whose sentence was subsequently commuted, was discharged today as cured from the sanitarium at Oberhof, where he had been confined since he was pronounced insane in 1904.

The prince will go to Argentina in charge of a guardian appointed by the court, where he will become a farmer. His title has been dropped, the court giving him the name of Blendon.

The Arenburg case has several times been the subject of discussion in the Reichstag. Newspapers charged the prince was not treated as other prisoners, but was addressed as "your highness" and given an easy time.

## JEWELER IS STABBED.

HAMBURG, Iowa, Aug. 20.—J. T. Nace, a jeweler here, was attacked while asleep in his apartment above his jewelry store early today. Nace was stabbed three times. One thrust of the blade penetrated an eyeball. Nace ran into the street and gave the alarm by firing a revolver.

Mrs. Dowell, a widowed niece, who occupied an adjoining apartment, was placed under arrest today, pending an investigation.

## DEAL NOW ON TO SECURE PRODUCING OIL PROPERTY INVOLVES \$2,000,000

Holdings of Several Smaller Companies Optioned; New Interests May Build Pipe Line to Tidewater, Is Report; Field at Coalinga Active.

COALINGA, Aug. 20.—There has developed a lively demand for producing property in this field. The parties interested are from the financial centers of the East, Canada and England. A deal is now on in which several of the smaller companies have optioned their holdings for \$2,000,000. Parties interested state that the deal is progressing satisfactorily. The minor details are now being adjusted. The interests that are in this deal have secured holdings in the south part of the San Joaquin belt, and from what is known in Fresno, these interests are prepared to build a pipe line to tidewater, if it should be found necessary, to handle the product. The men of the East and of Canada, as well as of England, appreciate the stability of this field, and are getting interested in good property.

The Berkeley-Coalinga Oil Company, a new company in this field, organized to operate on the south half of the northeast quarter of section 2, 21-14, is now drilling in a test well with a 10-inch casing. This is supposed to be a shallow test well. The company will prove up the ground with a portable, and will then put in standard rig and tools. The company is after good oil. This section has some very large seepages of oil which indicate a very heavy grade of oil. The seepages along the outcroppings are flowing much more oil at this time than they did last spring. This is one of the features that have prompted this development, as well as the desire to produce a good oil.

The Fresno-San Francisco Oil Company, section 1, 20-14, has entered into a contract with Andy Ferguson and brother to drill a test well on this property. This deal and the first well, has just been completed.

The Coalinga-Midway Oil Company, section 10, 19-15, is building a standard rig and will soon be drilling. The company has a very favorable lease, 1-8 royalty, on the north half of the southwest quarter, and the southwest quarter of the northwest quarter, 120 acres. This is considered a 1,000-foot territory.

The United Development Company, operating on the northeast quarter of section 19, 20-15, is 250 feet deep, has landed the 15-inch above pipe casing, and has put in 12 1/2-inch casing. California special. Two more rigs are to be built at once on section 19, one on the southeast quarter and one on the north half of the southwest quarter.

The Michigan Oil & Development company has moved to a new location, now on section 22, 19-13, has completed a standard rig and will soon be drilling. The hole on section 8, 19-13, has shown up considerable gas and some oil, but is deep territory.

The Nevada Petroleum Company, on section 18, 20-15, well No. 2 is making fully 675 barrels per day by geyser, and has steadily increased during the last week. Well No. 2 on section 20, 20-15, is making a strong 400 barrels per day, both wells are new.

The Esplanade Consolidated Oil Company, section 6, 20-15, has built a 106-foot derrick for rotary tools, is rigging up, and will start in this week. The 6 1/2-inch casing of casing has been landed out for the well now drilling with standard tools.

The Coalinga Security Oil Company, section 8, 20-15, is drilling out the cement plug in well No. 1. The well has stood cemented for about ten days at 2,753 feet with 6 1/2-inch casing. This well is to be completed with the rotary.

The Coalinga-Monterey Oil Company, section 4, 20-15, is hauling out a string of 4-inch, 5-pound rotary drilling pipe, having changed from the 6-inch pipe. The well is now about 2,200 feet deep.

The Coalinga Eight Oil Company, section 8, 20-15, has hauled out a string of 10-inch casing. The well has been drilled with a rotary and is now over 1,300 feet deep.

The W. K. Oil Company, section 2, 20-15, has rigged up for the rotary on well No. 8, and will start in this week. Well No. 6 is nearing completion; well No. 7 is about 500 feet deep with 12 1/2-inch casing.

The Blair Oil Company, section 14, 21-15, is 150 feet deep in well No. 2.

The Seva Valley Oil Company, section 2, 22-18, near the Blair well, has completed a full standard rig, ideal from and other new appliances. It is now updrilling in.

The Zier Oil Company, section 1, 20-14, has an oil well pumping. The company is selling oil to the Southern Pacific at 50 cents per barrel.

The Kern Trading Oil Company has completed a full standard rig on section 35, 10-15, and will start in this week.

The British California Limited Oil company has completed a full standard rig on section 24, 20-14, the Washington well.

The Turner Oil Company, section 2, 20-15, is making ready to start up work on well No. 3.

open hole. The rig for well No. 2 is situated 300 feet north from well No. 1. The Coalinga Oil Company, section 7, 22-17, is 1,450 feet deep in well No. 1 with 10-inch casing; formation, sandy shale with a showing of oyster shells. There is considerable gas and a nice showing of light oil.

The Camwell Oil Syndicate company, section 22, 19-15, has material on the ground for three more rigs; is building a new boiler plant and will install two 70 horse power boilers.

The Splunka Crude Oil Company, section 12, 20-14, has temporarily shut down until the company can relieve the pump holes that are at present crowded.

The Seva Valley Oil Company, section 2, 22-18, near the Blair well, has completed a full standard rig, ideal from and other new appliances. It is now updrilling in.

The Zier Oil Company, section 1, 20-14, has an oil well pumping. The company is selling oil to the Southern Pacific at 50 cents per barrel.

The Kern Trading Oil Company has completed a full standard rig on section 35, 10-15, and will start in this week.

The British California Limited Oil company has completed a full standard rig on section 24, 20-14, the Washington well.

The Turner Oil Company, section 2, 20-15, is making ready to start up work on well No. 3.

Rose then ran into another room and locked the door. When Ewing left he followed him on the street he requested City Marshal Joe Harris to search Ewing and take the revolver away. The marshal did not want to do this without papers, while he was getting the papers, Ewing, according to Rose, disappeared the weapon. When Ewing finally was searched he did not have a weapon. Upon finding out that his enemy was unarmed, Rose again hunted Ewing up and proceeded to beat him with his fists until the constable and four men jumped in to save Ewing. Rose paid \$10 for this diversion. Ewing was arrested for disturbing the peace and pleaded not guilty.

## RALPH ROSE BEATS UP KEEPER OF A TAVERN

Shot Put Champion, Now City Attorney, Says Opponent Flashed Gun.

HEALDSBURG, Cal., Aug. 19.—City Attorney Ralph W. Rose, shot put champion, who is known to fame also as a one-time challenger of James J. Jeffries, had an altercation in his office today with A. M. Ewing, a tavern keeper, formerly of San Francisco, during which, according to Rose, Ewing attempted to shoot him.

Rose and Ewing were alone in the office at the time, and as Rose tells the story, Ewing, who had abused him for some time over the matter of an injunction against the construction of a garage, drew a revolver with four feet of him and fired twice at the stomach. For some reason the gun failed to be discharged.

Rose then ran into another room and locked the door. When Ewing left he followed him on the street he requested City Marshal Joe Harris to search Ewing and take the revolver away. The marshal did not want to do this without papers, while he was getting the papers, Ewing, according to Rose, disappeared the weapon. When Ewing finally was searched he did not have a weapon. Upon finding out that his enemy was unarmed, Rose again hunted Ewing up and proceeded to beat him with his fists until the constable and four men jumped in to save Ewing. Rose paid \$10 for this diversion. Ewing was arrested for disturbing the peace and pleaded not guilty.

## Bluffs Moquet

The Perfect Wash for the Hair

is as different from anything else you've ever used for a shampoo as day is from night. The fluffiness, the cleanliness, the satisfaction of one shampoo with it will make it your long friend. Dandruff disappears as it by magic. One wash proves its worth. 10 cents per package.

## Facts About Your Teeth

TOLD BY Drs. Free, Carmichael & Free

When we established ourselves in Fresno about eight years ago, we had been practicing elsewhere about seven years. We had nothing to recommend us except the reputation gained elsewhere, which, as a matter of course, could only be known here to a very limited degree. We were here to succeed and we realized that we could succeed only on our merits. It had been our aim from the first day we engaged in dental work, some fifteen years ago, to execute the best work possible. This name rule we rigidly adhered to when entering the Fresno field. As a result we feel safe in saying that if any other dental office in this city enjoys a larger practice than ourselves, we are not aware of it. Nor does any office enjoy a better reputation among its patrons for executing high class and satisfactory work. One reason why our work is superior to that of other offices is that we are always watchful of the advances and new discoveries made in dentistry, and are almost invariably the first in this field to adopt any and every device, discovery and method calculated to improve our work and minister to the comfort of our patients. As an instance in this line of policy we refer with pride to the extraordinary success we are meeting with in our

ALVEOLAR METHOD OF DENTISTRY

This is a most scientific and practical method of replacing missing teeth without the use of plate or bridge. They are in all respects practically as good as the natural ones. They are as serviceable. They are cleaned in the same manner as the natural teeth and there is nothing in the shape of a plate to interfere with taste or speech. In order to introduce the Alveolar work it is necessary for you to have two or more of the natural teeth in the jaw to which the replaced teeth can be anchored. If these teeth remaining in the jaw are loose, we can tighten them, leaving the new work firm and solid in the highest degree.

WE ARE DENTAL EXPERTS.

We execute all manner of dental work in a manner that cannot be excelled and we can refer you to hundreds of our satisfied patients to confirm this statement

## PACKERS TO PURCHASE DRIED FRUIT EXHIBIT

Will Pay Market Price for  
Everything Shown at  
County Fair.

In order to stimulate interest in the exhibition of raisins, peaches and other dried fruit, the Fresno Agricultural Association has introduced a novel scheme which it is believed will result in an overwhelming number of exhibitors.

The Fresno Home Packing Company will purchase all the raisins placed on exhibit at the fair by growers, paying the market price for them. Raisins will only be exhibited in 100 pound lots. To the exhibitor winning first prize for the best exhibit of merchantable goods, the Fresno Home will pay double the market price for the goods. To the second best exhibitor, one and one-half the market price will be paid and the winner of third place will be given one and one-quarter the market price. All the remaining exhibitors will be paid the straight market price for their goods.

The Giffen-Hobbs Company will purchase all the dried peaches exhibited at the fair, in 100 pound lots and the same offer to prize winners will be made as was made by the Fresno Home for the best raisin exhibits.

The Toomey Fruit Company will buy all the dried figs placed on exhibit at the fair, with the same price offers to winners. Exhibits of figs will be made in 100 lots.

**THAT SOUR STOMACH**  
Can be cured with M. A. C. which never fails to give results. Only at Smith Bros. Drug Store.

## FRESNANS ENTERTAIN AT SILVER WEDDING

Mr. and Mrs. Robinson Have  
Guests From Many California Towns.

Mr. and Mrs. W. E. Robinson of this city entertained last night at a silver wedding, guests from Fresno and Kings counties and Southern California being present at a thoroughly delightful dinner, served at 7 o'clock last evening at the Robinson home, 6 and Tulare streets. Thirty covers were laid.

Besides the host and hostess the following were present as guests: Mr. and Mrs. Joseph Kieffer, Mrs. W. H. Schuyler of Santa Barbara, Mr. and Mrs. William Hoffman of Oxnard, Mr. and Mrs. U. S. Bock of Sanger, Mr. and Mrs. C. W. Clark, Mr. and Mrs. A. A. Smith, Mr. and Mrs. Arch Coughell, Mr. and Mrs. A. J. Butler, Mrs. E. Hoover, Mrs. P. Kover, Mrs. H. L. Ward of Laton, Mrs. William Frame of Hanford, Dr. G. H. Phillips of Hanford, Robert Phillips and Miss Phillips of Laton, Miss Florence Hickey, Miss Beal, Roy Kieffer, Frank Bates, A. Stoenard, J. Gibson, J. Bonfield, Grant Howard, Ross Russell, Rowena Bock, and Lyle Bock.

Mr. and Mrs. Robinson expect shortly to leave on an extended Eastern trip to Mr. Robinson's former home in Illinois, it being forty years since he left there to make his home in California, during which time he has not been back.

## UNDERWRITERS WILL ADVISE COALINGANS

Representative to Discuss  
Means of Better Protection From Fire.

COALINGA, Aug. 20.—Mayor May has been appointed to interview the fire underwriters of San Francisco for the purpose of having a special agent come here and look into the matter of fire protection, so the trustees can arrange to meet the requirements and not have to submit to an increased rate. That he has been successful is shown by the receipt of the following telegram by Trustee Phelps today:

"R. B. Mattheis, of underwriters, will arrive on the 9:15 Monday. Notify Boland and Peeler and give him all the information you can. They were very nice and offer to help us in any way they can."

Harry Bender, the fireman who was seriously burned when he came into contact with 500 volts of electricity yesterday, is not improved today. It was first reported that the man would undoubtedly recover, but when seen today by Dr. Warren, who is attending him, stated that Bender's change of surviving the terrible accident is very slim. Warren intends to amputate the unfortunate's left arm, which was burned from the finger tips to the shoulder, at the latter joint. His right shoulder, which was also badly burned, would heal very readily, while the left arm is entirely dead.

## BRIDGES INTERRUPT CANVASS OF VOTES

MADERA, Aug. 20.—The supervisors returned last night from North Fork, where they went to inspect the bridges recently built there. They began the work of canvassing the election returns where they left off yesterday and were making good progress. The canvass will be completed Monday.

Mrs. C. A. Wolf of Zolbs yesterday evening swore to a complaint charging Theodore Alvise, a butcher in Crane valley, who supplies meat to the camps of the San Joaquin Power Company, with grand larceny. She alleges that on the 20th of July, Alvise butchered a steer belonging to her. Constable Lewis left last night for Crane valley to serve the warrant.

D. E. Fowler, who was beaten for the Republican nomination for supervisor of this district by two votes, will probably contest the election of W. H. Thomas.

## STATES GET MONEY TO SUPPORT MILITIA

California Is Among Those  
to Receive More Than  
\$25,000.

WASHINGTON, Aug. 20.—Every state and territory in the Union with the single exception of Nevada, which is without a militia, gets a portion of the \$1,500,000 appropriation for the purchase of supplies and ammunition for the organized militia during the present fiscal year in the first allotment of the \$1,500,000 war fund. The department has reserved about \$10,000 of the fund for emergencies.

Under the allotment which was made according to the relative strength of the organized militia in the various states, five states get more than \$50,000 each. Of these New York leads with \$206,000; Pennsylvania follows with \$140,000; Illinois with \$134,000; Massachusetts with \$124,000; and Utah ends the list with only \$1,478, while Delaware, Hawaii, Idaho, North Dakota and Wyoming are the only others to get less than \$10,000.

The department has allotted \$2,000,000 to the states and territories, on a basis of representation in Congress, for arms, equipment, camp purposes and promotion of rifle practice in the militia organizations.

## SMITH APPRECIATES DOUBLE NOMINATION

A. B. Smith, our popular tax collector, was feeling good and in talkative mood last evening.

To a Republican representative he said:

"I hope to be able to personally thank all my constituents, Democrats and Republicans, for the splendid endorsement given me and my administration of the tax collector's office."

"At the same time, whether I shall be able to see them all or not, they may rest assured that the completion of so large a vote by my own party carrying the nomination, together with the nomination by the Democrats, is heartily appreciated."

"I have administered the office of tax collector of this county without fear or favor and to the very best of my ability, and this practically unanimous endorsement by the voters is a matter to me of both pride and gratitude."

## GERMAN ROYALTY AT POLISH PALACE

POSEN, Aug. 20.—Emperor William, the Empress, Crown Prince, Frederick Wilhelm and Crown Princess Cecilie, Prince Eitel Friedrich and the younger members of the imperial family arrived here today for a house-warming of the new royal residence. The festivities will last three days.

This palace, the fifty-first owned by the emperor, to maintain which he recently sold to the state his country places, has been built, for reasons of state, to symbolize to the Poles the Prussian supremacy in German Poland. It has been assigned by the emperor as the permanent residence of Prince Eitel Friedrich, his second son.

It is a massive structure, built at a cost of \$1,335,000, covers nearly an acre and a half and contains more than 600 rooms. Among these is the great banquet hall, surpassing in size and brilliancy of decoration any room of the kind in Germany, being a fifth larger than the famous white hall in the imperial castle in Berlin. Its walls are paneled and richly carved in marble.

A tower 240 feet high surmounts the chapel, which is exquisitely decorated with mosaics executed by Prof. August Oetken of the imperial technical school at Charlottenburg. In this Emperor William will personally conduct divine service when in residence here, as is his custom.

## IMMIGRATION LAWS TO BE BETTER ENFORCED

Entry of Russian Jews at  
Galveston Is Cause of  
Inquiry.

WASHINGTON, Aug. 20.—The entry of Russian Jew immigrants at the port of Galveston, Texas, will be regulated more closely in the future. Department of Commerce and Labor officials reached this decision today after investigation which convinced them that the laws had been loosely enforced. Not long ago conditions were found there which led to the discharge of one inspector.

The latest immigrants arrived last Wednesday. The action of department officials in refusing admission to the 100 Jewish immigrants on board has been the subject of protest.

While the department disavows any intention to discriminating against that class of immigrants, Assistant Secretary Lable is determined that the immigration standards at Galveston shall come up to those required at other ports.

## RUSSIAN REFUGEE WILL BE DEPORTED

SAN DIEGO, Aug. 20.—Alexei Mixlin, alias Francisco Corral, now in jail on a charge of burglary and assault with a deadly weapon, is a Russian, who, according to United States immigration officials today, escaped from them on a dock in this city several nights ago while the officers were waiting to report him on a steamer bound for Ensenada, L. C. He was arrested last Wednesday night by a policeman who found him fighting with a negro. The immigration officers were warned by officials at Nogales, Arizona, to be on the watch for him and if he succeeded in clearing himself of charges now pending the deportation order will be immediately executed.

**FATAL STROKE ON STREET.**  
OAKLAND, Aug. 20.—H. S. Breuer, treasurer for the White Horse Company of this city, was stricken with heart failure this morning as he was on his way from the postoffice to his place of business. He staggered into a nearby cafe and became unconscious. An ambulance was summoned and Breuer died in 15 on his way to the receiving hospital. He was prominent in Masonry and leaves a wife and young son.

## OLNEY ELECTED TO SANTA BARBARA HIGH

Former Fresno Principal  
Will Remove to the  
Southern City.

A. C. Olney, for the past ten years principal of the Fresno High school, leaves next Tuesday, with his family, for Santa Barbara, where Mr. Olney has accepted the position of principal of the Santa Barbara High school. Mr. Olney was offered numerous positions in various parts of the state, including the principalship of a new high school in Los Angeles, but accepted the Santa Barbara position as the most desirable.

Mr. Olney has the reputation among the teachers and educational leaders of California as being one of the most capable and successful teachers and most tactful school managers in the state. His many friends among the graduates of the Fresno High school and in the community generally will greatly regret his departure, but will congratulate Santa Barbara on a valuable acquisition.

## CANVASS OF VOTES IS TEDIOUS TASK

The work of canvassing the vote cast at the primary election last Tuesday was started in earnest yesterday by the board of supervisors and occupied the attention of the members of the board all yesterday morning.

The board scarcely more than made a good start, however, owing to the untoward nature of the vote. When adjournment was taken yesterday noon, it was decided to work night and day this week until the count is completed.

## TULARE COUNTY IS STRONG INSURGENT

VISALIA, Aug. 20.—Complete returns from Tulare county, with the exception of one small precinct, show that the insurgent candidates for nomination on the state ticket were given handsome pluralities in every instance and in several instances the insurgent candidates were given a majority vote over the entire opposition. Hiram Johnson ran stronger than any of the others, as he did in all other parts of the state, but majority votes were tendered A. J. Wallace, B. Grant Taylor and John D. Works. Johnson polled the highest vote of any of the insurgent candidates.

## PRINCELY CONVICT TO BECOME FARMER

HANOVER, Aug. 20.—Prince Prospero of Anhalt was condemned to death by a court martial in German Southwest Africa in 1899 for murder and other crimes committed against the natives, but whose sentence was subsequently commuted to life imprisonment.

The prince will go to Argentina in charge of a guard appointed by the court, where he will become a farmer. His title has been dropped, the court giving him the name of Blonden.

The Arenberg case has several times been the subject of discussion in the Reichstag. Newspapers charged the prince was not treated as other prisoners, but was addressed as "your highness" and given an easy time.

## JEWELER IS STABBED.

HAMBURG, Aug. 20.—J. T. Nace, a jeweler here, was attacked while asleep in his apartments above his jewelry store early today. Nace was stabbed three times. One thrust of the blade penetrated an eyeball. Nace ran into the street and gave the alarm by firing a revolver.

Mrs. Dowell, a widowed niece, who occupied an adjoining apartment, was placed under arrest today, pending an investigation.

## HOTEL BURNED BY TRAMPS.

SEATTLE, Aug. 20.—The famous hotel at Green River Hot Springs, which was burned last night, was set on fire by tramps, according to Northern Pacific officials. The hotel had been closed, and its new owners were about to begin extensive improvements. There have been no forest fires in Green River. Tramps burned two loaded freight cars at Hot Springs yesterday and also robbed the railroad station.

## DEAL NOW ON TO SECURE PRODUCING OIL PROPERTY INVOLVES \$2,000,000

Holdings of Several Smaller Companies Optioned; New Interests May Build Pipe Line to Tidewater, Is Report; Field at Coalinga Active.

COALINGA, Aug. 20.—There has developed a lively demand for producing property in this field. The parties interested are from the financial centers of the East, Canada and England. A deal is being made in which several of the smaller companies have optioned their holdings, the price to be paid will run over \$2,000,000. Parties interested state that the deal is progressing satisfactorily. The minor details are now being adjusted. The interests that are in this deal have secured holdings in the south part of the San Joaquin belt, and from what has leaked out in Fresno, these interests are prepared to build a pipe line to tidewater, if it should be found necessary, to handle the product. The men of the East and of Canada, as well as of England, appreciate the stability of this field, and are getting interested in good property.

The Berkeley-Coalinga Oil Company, a new company in this field, organized to operate on the south half of the northeast quarter of section 2, 21-14, is now drilling in a test well with a portable rig. This is supposed to be shallow territory. The company will prove up the ground with the portable, and will then put in standard rig and tools. The company is a road oil. This section has some very large seeps of oil which indicate a very heavy grade of oil. The seepages along the outcroppings are flowing much more oil at this time than they did last spring. This is one of the features that have prompted this development, as well as the desire to produce a road oil.

The Fresno-San Francisco Oil Company, section 1, 20-14, has entered into a contract with Andy Ferguson and brother to drill seven wells upon this property. The derrick and rig for the first well has just been completed.

The Coalinga-Midway Oil Company, section 10, 10-15, is building a road into the section to get in the material for rig and buildings. The company has a very favorable lease, 1-8 royalty, on the north half of the southwest quarter, and the southwest quarter of the northwest quarter, 120 acres. This is considered 1,000-foot territory.

The United Development Company, operating on the northeast quarter of section 10, 20-15, is 250 feet deep, has landed the 15-inch pipe, and is now running 12 1/2-inch casing. The company has a very favorable lease, 1-8 royalty, on the north half of the southwest quarter, and the southwest quarter of the northwest quarter, 120 acres. This is considered 1,000-foot territory.

The Coalinga-Midway Oil Company, section 10, 10-15, is building a road into the section to get in the material for rig and buildings. The company has a very favorable lease, 1-8 royalty, on the north half of the southwest quarter, and the southwest quarter of the northwest quarter, 120 acres. This is considered 1,000-foot territory.

The Coalinga-Midway Oil Company, section 10, 10-15, is building a road into the section to get in the material for rig and buildings. This is considered 1,000-foot territory.

open hole. The rig for well No. 3 is situated 300 feet north from well No. 1. The Dominion Oil company, section 2, 21-17, is 1,400 feet deep in well No. 1 with 10-inch casing, formation, sand and shale with a showing of oyster shells. This is considered gas and a nice showing of light oil.

The Camwell Oil Syndicate company, section 2, 19-16, has material on the ground for three more rigs; is building a new boiler plant, and will install two 70 horse power boilers. The Spinks Crude Oil company, section 12, 20-14, has temporarily shut down until the company can relieve the pump holes that are at present crowded.

The Seva Valley Oil company, section 2, 22-18, near the Blair well, has completed a full standard rig, ideal from and other new appliances. It is now spudding in.

The Zier Oil company, section 1, 20-14, has all wells pumping. The Pacific is selling oil to the Southern Pacific at 50 cents per barrel.

The Kern Trading and Oil company has completed a full standard rig on section 35, 10-15, and will spud in this week.

The British California Limited Oil company has completed a full standard rig on section 24, 20-14, the Wash.

The Turner Oil company, section 2, 20-15, is making ready to start up work on well No. 3.

The Coalinga-Midway Oil company, section 10, 10-15, is building a road into the section to get in the material for rig and buildings. The company has a very favorable lease, 1-8 royalty, on the north half of the southwest quarter, and the southwest quarter of the northwest quarter, 120 acres. This is considered 1,000-foot territory.

## RALPH ROSE BEATS UP KEEPER OF A TAVERN

Shot Put Champion, Now City Attorney, Says Opponent Flashed Gun.

HEALDSBURG, Cal., Aug. 19.—City Attorney Ralph W. Rose of this city, holder of the world's shot-putting record, who is known to some also as a one-time challenger of James J. Jeffries, had an altercation in his office today with A. M. Ewing, a tavern keeper, formerly of San Francisco, during which, according to Rose, Ewing attempted to shoot him.

Rose and Ewing were alone in the office at the time, and as Rose tells the story, Ewing, who had abused him for some time over the matter of an injunction against the construction of a garage, drew a revolver within four feet of him and fired twice at his stomach. For some reason the gun failed to be discharged.

Rose then ran into another room and locked the door. When Ewing left he followed him. On the street he requested City Marshal Joe Harris to search Ewing and take the revolver away. The marshal did not want to do this without papers, while he was getting the authority, Ewing, according to Rose, disposed of the weapon. When Ewing finally was searched he did not have a weapon. Upon finding out that his enemy was unarmed, Rose again hunted Ewing up and proceeded to beat him with his fists until the combatant and four men jumped in to save Ewing. Rose paid \$10 for this diversion. Ewing was arrested for disturbing the peace and pleaded not guilty.

WASHINGTON, Aug. 19.—Found guilty of leaving his post of duty before being relieved, and of sleeping on duty, a member of the U. S. Navy, U. S. N., of New York was today reduced thirty-one numbers and publicly reprimanded by the secretary of the navy.

A clique of stock brokers who have been operating for a decline in a group of stocks in which we are interested, circulated a rumor to the effect that we were slow in taking up securities. As a result there ensued a rush to make deliveries and certify all outstanding checks. One of the banks with whom we are doing business, and on whom the checks were drawn, certified until 6:30 p. m., which was thirty minutes after the closing hour. Then they stopped. They could have stopped according to custom, thirty minutes earlier had they wished.

We called on the vice president of the bank at 4 o'clock and he gave us a statement showing that there was both a cash credit and credit on outstanding collections amounting to thousands of dollars in excess of all outstanding claims.

NEW YORK, Aug. 19.—Miss Delphina Richardson, said to be worth more than \$300,000, was evicted from the home in which she had lived since her birth fifty years ago, because she would not surrender possession to the man to whom she had sold it. A city marshal finally took her away through the front door.

Miss Richardson is one of the wealthiest women in the world. When her father, Joseph Richardson, died in 1837, she inherited the bulk of his great fortune, and has since lived frugally with her mother, Mrs. Richardson, who sold her home, she would never allow the buyer on the premises and he had to make his plans for rebuilding it from outside observations.

While the marshal's men piled the frayed, old-fashioned furniture on the sidewalk today, Miss Richardson followed them about, protesting that their actions were outrageous and that she would complain to Mayor Gaynor.

The business game today calls for minds thoroughly trained and capable of working out important issues. Are you capable of fulfilling such a position if it was offered you today? Could you "make good" if the opportunity presented itself tomorrow?

You could if you were a graduate from Heald's. Hundreds of our graduates are now holding important positions, holding them successfully too, because of the thorough training they received from us. Obey that impulse and write to Heald's and write today.

The numerous calls we have received daily for help of all kinds from the business houses in Fresno and vicinity and which we couldn't begin to supply, leads us to state positively that you are assured of a splendid position immediately after finishing your course with us. The demand has been enormous this season. It will be greater next season, prepare for it!

GRASS VALLEY, Cal., Aug. 19.—The forest fire seven miles east of here is burning in great volume and it was last night, according to Supervisor Bigelow, who returned here tonight, there is no chance, he said, to get it under control before tomorrow night.

More than 8000 acres have been burned here and the flames are headed toward the Swiss boxes of the South Yuba Water Company. The Fowler saw mill was saved.

The fire is burning toward Deer Creek, where the city lighting plant is installed. The flames have been turned in an opposite direction from this city. The third fire broke out three-quarters of a mile away from the main blaze. Fifty men are sent out by mining companies today. Men to fight the fire are scarce.

YONKERS, N. Y., Aug. 19.—An enterprising Yonkers locksmith is under arrest here as a result of his unique method of advertising his wares. He claims that all ordinary bars and bolts are worthless in the face of a skilled lock-picker and has been attempting to introduce a device of his own which he said would protect a house adequately.

His method of drumming up business was to go to a house, deftly turn a lock and, entering tap the surprised housekeeper on the arm and ask her if she did not think she ought to have a real lock on the door. Numerous complaints reached the police and he was arrested.

BURNED WITH BARN. GRESHAM, Ore., Aug. 19.—While trying to save her burning barn from being totally destroyed by a forest fire Wednesday, Mrs. Mary Strauss, wife of a lumber mill proprietor, became the object of the flame's attack, and her clothing was instantly a pillar of flame. J. R. Duncan, a neighbor, rolled her upon the ground and chucked dirt on her until the fire was extinguished, but Mrs. Strauss was so seriously injured it is doubtful if she will recover.

LONE VOTER CANDIDATE. SAN BERNARDINO, Aug. 19.—Charles P. Harper, candidate and entire election of Whipple precinct, out on the street brought in the "official returns" yesterday. He lone vote nominated himself as candidate for the office of constable. Harper is also justice of the peace of Calzona. His name will go on the ballot at the November election as Republican and Democratic candidate for constable.

TABLETS AND WRITING PAPER. Relief sent while they last at Smith Bros. Drug Store.

## LONGSHOREMAN WRECKS A HOSPITAL

SAN FRANCISCO, Aug. 18.—Objection to the application of a derrick to a wound in his head which he had sustained in a fall, Jerry Davis, a longshoreman, weighing 210 pounds, went on a rampage in the Central Emergency hospital tonight and partially wrecked the place. It required the combined efforts of two doctors, three stewards, an ambulance driver, two policemen and three newspaper men to subdue him. Before he was finally placed in a straight-jacket and strapped to a cot he had hurled himself through two doors, had broken three windows and besides knocking over the operating table had smashed the instrument case. Davis will be kept under wraps until he has recovered from the evil influence that caused the original fall on the water front.

## FOREST FIRE LOSS FOUR MILLION FEET

SEATTLE, Aug. 19.—Only about 4,000,000 feet of first-class green standing timber has been destroyed by forest fires in Western Washington this season, according to compilations made yesterday by D. P. Sidons, chief warden of the Washington forest fire association.

About 20,000 acres have been burned over this season west of the Cascade Mountains, a large part of which, however, was logged off, in addition to the green timber. Mr. Sidons says that thousands of cords of firewood and shingle bolts and many fallen trees that might have been cut into logs have been burned.

So far about 200 forest fires have been reported in Western Washington. The association in its fight against fires has employed 600 men in addition to the 125 rangers and patrolmen constantly on duty, and has built 500 miles of trail. The sums spent so far in saving timber total \$35,000.

Although the season, up to last Sunday, was worse than a year ago, as to forest fire risk, Mr. Sidons stated yesterday that the loss of standing timber has not been as great as during the corresponding period in 1909.

## Facts About Your Teeth

TOLD BY Drs. Free, Carmichael & Free

When we established ourselves in Fresno about eight years ago, we had been practicing elsewhere about seven years. We had nothing to recommend us especially to the Fresno public except the reputation gained elsewhere, which, as a matter of course, could only be known here to a very limited degree. We were here to succeed and we realized that we could succeed only on our merits. It had been our aim from the first day we engaged in dental work, some fifteen years ago, to execute the best work possible. This same rule we rigidly adhered to when entering the Fresno field. As a result we feel safe in saying that if any other dental office in this city enjoys a larger practice than ourselves, we are not aware of it. Not does any office enjoy a reputation among its patients for executing high class and satisfactory work. One reason why our work is superior to that of many is that we are always watchful of the advances and new discoveries made in dentistry, and are almost invariably the first in this field to adopt any and every device, discovery and method calculated to improve our work and minister to the comfort of our patients. As an instance in this line of policy we refer with pride to the extraordinary success we are meeting with in our

ALVEOLAR METHOD OF DENTISTRY

This is a most scientific and practical method of replacing missing teeth without the use of plate or bridge. They are in all respects practically as good as the natural ones. They are as serviceable. They are cleaned in the same manner as the natural teeth and there is nothing in the shape of a plate to interfere with taste or speech. In order to introduce the Alveolar work it is necessary for you to have but two or more of the natural teeth in the jaw to which the replaced teeth can be anchored. If these teeth remain in the jaw are loose, we can tighten them, leaving the new work firm and solid in the tightened stage.

WE ARE DENTAL EXPERTS.

We execute all manner of dental work in a manner that cannot be excelled and we can refer you to hundreds of our satisfied patients to confirm this statement. Some of our new methods include porcelain fillings, gold inlay fillings and aluminum plates. In crowning, filling and in fact every feature of our work you can depend upon the best. If we do it.

YOU CAN CONSULT US FREE.

We cannot, owing to the nature of our work, go to you with same. It is necessary for you to come to us. We want you to feel at liberty to consult us at any time free of cost. You do not thereby incur any obligation to have any work executed. We will be glad to give you an estimate of the cost of any needed work and we assure you that you will find our charges most reasonable, no more than you will be willing to pay for the high class services we will render.

His name will go on the ballot at the November election as Republican and Democratic candidate for constable.

—Write to Heald's Today.  
—Find Out Why Others Succeed.  
—Find Out How You Can Succeed.

FALL TERM BEGINS SEPT. 5TH.

You have had an impulse to write to Heald's and find out all about it. Obey that impulse! The time to begin getting a business education is September 5th, and in a very short time you'll be offered a position that otherwise you could never expect to attain. There is no time to be lost. Quit thinking about it. Don't put it off another minute. Write today. Fall term begins September 5th, and you should be one of the hundreds to answer roll call on opening day. It's the progressive thing to do.

The business game today calls for minds thoroughly trained and capable of working out important issues. Are you capable of fulfilling such a position if it was offered you today? Could you "make good" if the opportunity presented itself tomorrow?

You could if you were a graduate from Heald's. Hundreds of our graduates are now holding important positions, holding them successfully too, because of the thorough training they received from us. Obey that impulse and write to Heald's and write today.

The numerous calls we have received daily for help of all kinds from the business houses in Fresno and vicinity and which we couldn't begin to supply, leads us to state positively that you are assured of a splendid position immediately after finishing your course with us. The demand has been enormous this season. It will be greater next season, prepare for it!

# ATTORNEY TELLS OF TRAMP AMONG UNCHARTERED WASTES OF SIERRAS

## How Fresno Lawyers Faced Difficulties Galore and Reached Grouse Meadow--Third Party Ever to Perform Feat.

(BY J. P. BERNHARD.)

To men, who go to the mountains, the mention of a place, remote, inaccessible and unvisited, is both an invitation and an inspiration. For six months we have discussed Grouse Meadow, not the Grouse Meadow that you know, but that unique and charming plateau, hemmed in by sheer walls of granite, which lies on the Middle Fork of the Kings, five miles, in an air line, north of where Cartridge Creek cascades into the river. To the best of our knowledge it has been visited by two parties from this side of the Sierras, and they are far-famed pioneers in mountaineering. If it were possible to go up the river, the meadow could be reached in a few hours, but the only way of approach is to follow the three sides of a parallelogram of which the river is the fourth side. It took us four days to make this trip, during three of which we scrambled over a rough, steep and rocky country, without trail, monument or blaze.

A JOURNEY IN THE DARK.

## TALKS ON TEETH

BY REX DENTAL CO.

(INCORPORATED.)

## Alveolar Teeth and Enunciation

The partial plate, which people used to wear before the Alveolar Method of restoring missing teeth was discovered, interfered greatly with enunciation. The very fact of a foreign substance being introduced into the roof of the mouth made it necessary for people to learn to talk all over again. A great many never succeeded.

There is an unmistakable impediment in the speech of any one whose mouth is encumbered with a partial plate. The very fact of a foreign substance being introduced into the roof of the mouth made it necessary for people to learn to talk all over again. A great many never succeeded.

If you are a rank skeptic, we are going to tell you that you are not fair enough to give us a chance to prove that the Alveolar teeth are all that we claim. If you are wearing a partial plate or a bridge, so-called, which is actually destroying the teeth to which it is attached, we want you to come and allow us to make an examination of your mouth. We won't charge anything for the service and you will be under no obligation to have any teeth fixed. In the face of such indisputable evidence you can no longer be a skeptic.

We are prepared to submit the strongest kind of proof in the shape of letters from patients, and in addition, will refer you to some of the same cities in which our offices are, who will gladly tell you all you will want to know about our Alveolar teeth. In the face of such indisputable evidence you can no longer be a skeptic.

We have published a book entitled "Alveolar Teeth," which will gladly send you if you do not live close enough to come to one of our offices at this time. The book is one of the most valuable ever written on the subject of teeth. All the technicalities are left out and the subject is treated in clear, forceful, unambiguous, easily understood. Send for the book today and read it carefully.

The Alveolar Method is a painless piece of work from start to finish, and is not expensive.

JEWELERS,

1041 1 STREET, FRESNO.  
Watch repairing insured against all accidents.

there to Lemon Cove by electric car, and then a day and a half's staging over poor and dusty roads brought us to Quail Flat, whence we went by saddle animals to Kings River canon. Reaching the floor of the canon at dusk, the last seven miles were made in the dark. One could just see the moving shadow of his horse's head, there was no other course but to put your trust in your steed and give him free rein. The shadows of the tree trunks and boulders loomed threateningly. The rapid rushing river often

Grouse Meadow, a beautiful, remote, little-known spot.

seemed dangerously near. We forded streams whose foaming waters and white rocks glowed like phosphorus. We slipped suddenly into wooded tunnels so dark that you could not see the trees whose branches brushed your head. It was a wild, weird, lonely, through a wilderness of invisible influences and magical possibilities.

### THE SIERRA CLUB.

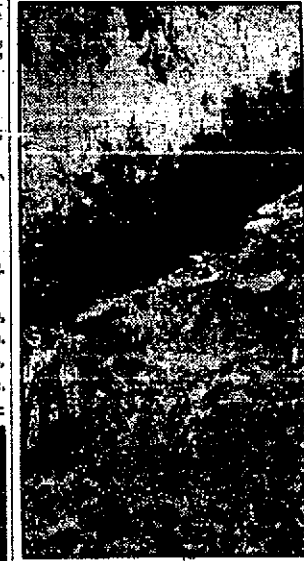

In the canon we met Mr. J. N. Le Conte, the "Map-Maker of the Sierras," and he kindly drew for us a rough sketch of the country beyond the trail, which we found a great aid in the first part of our journey into the rough country. That evening we took supper with the Sierra Club. The clothes worn by the different members of the club were strange and startling. There was a miscellaneous array of motley costumes. Such combinations as African helmets and felt slippers, black hats and tennis shoes, bathing suits and patent pumps were frequent. Garments of wonderful hues were thrown together regardless of harmony and recklessness of result. One lady was most attractive in a cardinal shirt just like the volunteer firemen in our town wear. The Chinese attendants showed the effect of this sartorial association by appearing in straw hats and overalls. It was a sight that no "hard-time" social or masquerade could surpass.

### CHANTECLER IN THE MOUNTAINS.

After supper the ladies gave an original play in which the actors impersonated animals as in the Chantecler. It was well written and well acted. The setting was ideal. The stage was an immense rock; the footlights, a pine cone fire; the scenery, a grove of oaks and pines, and the roof, the starry sky. All the animals of the forest were arrayed in very ingenious costumes, even to the snake who had as rattles a cluster of fruit cans. The animals recited their wrongs against the Sierra Club and plan to get rid of them. All seems hopeless, until at last man hemmed in by the restrictions of sleeping-bags and feminine society, declares that he will return to Berkeley where he can in his own room at last pull his trousers on while standing up.

### HOW ARCHIBALD'S REMAINS WERE FOUND.

The next day, with our regular equipment of four pack animals, we climbed steadily up 5400 feet to Granite Basin. Three years ago we here found an abundance of snow, this year there was none, this great bare bowl of solid granite seemed harsher than ever. At there we began to become acquainted with our packer, Frank Thompson, who was with our party.

Talus, near Cartridge Creek branch.

as, who in the trying days that followed, proved to be cool, even-tempered, and courageous, undaunted by hardships and unimpaired by obstacles and difficulties. It was he who discovered the remains of Kenneth Archibald, who was lost two years ago near Ray Lake. He found, between two immense boulders, the trousers, a

few finger bones, eyelets of shoes, six teeth, watch, a purse with \$13.40, a bandana handkerchief and diary. At the time this young man was lost, a reward of \$2000 was offered for the recovery of the body, but all efforts proved useless, and now, after two years, the retreating snow solves the mystery of his disappearance.

### THE MIDDLE FORK.

Our next camp was at Dougherty Meadow, and early the next forenoon, from the top of the hill, we saw the beautiful Middle Fork, with its turrets and domes, scarred and colored. At Simpson Meadow we had our first trout and killed our first snake. We had now been out a week, and the country so far was familiar. We still felt hampered by civilization, but realized that in a short time we would be into the unknown country. Sitting on a log facing Tunemah Mountain, famous for its roughness and its history of death to horses, last night black and fearful this morning, gray and cruel, and yet possessing trails and monuments, we wondered what this country held for us.

The trail to Snake Cabin proved unexpectedly easy. A log across Cartridge looked slight and the torrent terrible, so we held to a branch as we walked it. On our return ten days later, we had no changed, that the log looked safe as a bridge; the terrible torrent a ditch, and we sort of two-stepped across.

This was an ideal camp. Climate was perfect, fishing good, wood plentiful, and a near-by spring provided clean, cold water. This cabin, constructed of logs, was built many years ago for mining purposes. It possessed a window and a grand fire-place. Framed in the bark of a cedar tree just outside the door, and so protected from the wind, rain and snow, in the photograph of a woman, a subject of surprise and speculation for all who pass that way.

### IN THE COUNTRY BEYOND THE TRAILS.

Just below Triple Falls on Cartridge Creek we left all trails and signs of man, and breaking through heavy wood of willows, seemed severed from all the world. Up the mountain we made our way over talus and brush as best we could. This was slow work as the way had to be prospected, prepared and marked before we could go on. From where we camped we had a magnificent view of the Canon of the Middle Fork, Tunemah and Wood-

Observation Pass, 11,500 feet high.

worth showed gray, green and orange in the soft light of parting day, while their tops were veiled in clouds of fleecy whiteness.

At Triple Falls we had cached all of our canned goods, amounting to some fifty pounds. Realizing that our load must be lightened still more, we reduced ourselves to the actual necessities. Our culinary equipment now inventoried as follows: One frying pan, one stew pan, one Dutch oven, one coffee pot, one tin plate, one butcher knife, and one tablespoon, in addition there was a cup and spoon for each individual. Out of this cup we ate our stewed fruit, mush, bacon, hot cakes and coffee.

The going now was slow and difficult. We traveled over immense piles of talus, sharp and slippery, through brush so thick that closing in behind the pack animal it hid him from the view of the person following close behind. The way was steep, rocky and hard. In two weeks, thick walking shoes, protected by hob nails, were worn out. The narrow trail pulled out or worn even with the leather so that our footing was neither secure nor comfortable. To add to our discomfort, the wood-rats ate our leather shoe strings from the shoes placed under our heads. In some camps it was hard to find enough space to lay our beds. At one place we had a bed of boughs but it was so poorly made, that it was as comfortable as a net work of ball bats and rake handles.

### A DAY'S WORK.

The next day will always be remembered. Starting early, we climbed along a comparatively easy ascent for several hours, and then a mighty struggle up a precipitous rise of loose small rocks brought us to Observation Pass at an altitude of 11,500 feet. On the other side was an immense snow-filled, dropping some 1,500 feet in the distance of mile. It was old snow, almost ice. Trail was dug in the steepest parts with ax, pick and shovel. Waiting until 2 o'clock, when the snow was softest, we zigzagged the pack-trail safely down. Then we got into talus—broken rocks of all sizes and shapes, sharp as glass, hard as flint, loose and shifting. It was immense holes which had to be filled. We built trail for 200 feet by throwing rocks into the holes, the entire party worked rapidly and steadily for several hours before we dared risk saving our animals.

After a couple of hours of rough going the next morning we landed on a wooded slope, through which we slipped gradually down into Palisade Valley. Palisade Creek is a beautiful stream rising in the Palisades and emptying into the Middle Fork. For about five miles an undulating meadow follows this stream through thickets of yellow pine, willows, aspens, manzanitas and tamaracks, walled in on every side by rough and jagged peaks. This scene of green was a welcome relief to the eyes after the glare of the granite and the blinding brightness of the snow.

### GROUSE MEADOW.

Grouse Meadow, large, level, free of

trees and brush, lies shut in by high precipitous walls. At the head the river comes dashing down over the rocks with eternal foam and unabated roar, but in the valley its clear waters flow slowly in serpentine course through the high grass tinged with the yellow of early autumn and sprinkled with goldenrod and other flowers. It is a beautiful meadow whose charm is intensified by its seclusion and exclusiveness. Deer abound, and it was here we procured the venison which was a necessary and welcome addition to our food supply.

### THE WATER OUZEL.

One bright, still morning, I sat for a long time in the meadow grass along the river bank watching the water ouzels. Two young ones perched on a rock in midstream, chirping and bowing up and down, waiting to be fed. The older birds dive into the stream to procure the food. Chunky built, thickly feathered like a water fowl, but without webbed feet, they bowed to and down continually with all the activity of a diving bird.

### THE HORSE DOCTOR.

George Cosgrave, climbing one of the ravines for deer, fell and punctured his cordons and incidentally his leg. Fortunately, there was a horse doctor at hand, and the light of the blazing bonfire he washed and dressed the wound, treating it with brandy which we happened to find among our medical supplies, telling us at the same time of the remarkable success he had had with his last patient, a horse with a broken leg. The treatment was effective, suitable and appropriate, for the patient was soon able to walk without inconvenience.

### A DONKEY IN DIFFICULTY.

On the return trip we found that the snow had melted at both ends of our recently built trails, and we were compelled to do considerable work filling in these places. It was at this spot that we nearly lost one of our animals. The donkey slipped, fell into a hole and in trying to recover himself, firmly fixed his hind leg into a crevice between two enormous boulders. For an hour and a half our men worked hard to free that animal. We all felt blue and the case seemed hopeless. It looked as if we would be compelled to kill him. Finally by turning the animal entirely over, and taking all sorts of chances, and pulling with a united effort, he was released, and we were happy.

### A RISE IN DRIED APPLES.

At this night's camp, one of our number claiming to be versed in sanitary and scientific cooking, volunteered to stew some dried apples. He filled the stew pan, but in a short time its lid was forced off by the swelling fruit. He then transferred them to the Dutch-oven, but even its capacity and heavy cover could not withstand the raise. As we had cached our bath-tub, it became necessary to fill all of our utensils with dried apples, giving a supply of that commodity against which even mountain appetites proved helpless.

### THE WALK TO HUME.

On reaching Kings River canyon, we were able to procure but one saddle horse, so three of us walked to Hume by the lower trail, reaching there at 4 p. m., three hours before the riders. At the beginning of our vacation to have made this trip in two days would have tried us, but now we reaped of mile after mile at a good pace, climbed 4,000 feet high, dropped 4,000 feet down, and then climbed up again, and next morning felt fit to repeat. The canyon side of Boulder Creek was dry and parched and looked more like a lower foot-hill than a place of its altitude and situation and scattered all along the side was a cactus plant resembling yucca. During the latter part of this day's trip we passed through Sequoia forest, wonderfully beautiful, never counting the towering trees high into the

(Continued on Page 9.)

## We Are Showing Wonderful Values in Bags and Suit Cases

You will be well repaid for viewing this display of Bags and Suit Cases, even if you do not intend to purchase one immediately. Such values are really exceptional, as the quality is high and the prices so extremely moderate. We are making special efforts to interest you in this display, as it is a comparatively new venture with us and very interesting.

## They Are All New And Lately Received

So there is no danger of getting anything soiled or scratched. New innovations, stylish and dressy, here at prices that you will recognize at once as considerably lower than the average. The best time to view this showing is tomorrow.

When you examine this showing you will be impressed immediately with the smart appearance of these bags and suit cases. No danger of them being taken for imitations or second qualities. They are high qualities that are recognizable everywhere.

The right place to buy Bags or Suit Cases is where you know they are reliable—most anybody can pick out a stylish, handsome grip, but you have to take the dealers' word for its reliability; that's why it pays to trade at Monroe's. You can depend upon anything you buy from us. These Suit Cases and Bags are the best for the money that we've ever seen.

Filling prescriptions is an important branch of our business. It requires care, attention and specific knowledge of modern pharmacy. We have the best schooling and practical experience and can safely and honestly assure you of the best possible service.

We have a system of recording and checking which absolutely prevents mistakes.

## Turn In At Our Soda Fountain

It's the coolest place in town and we serve the coolest and best drinks you ever drank. They quench the thirst because they're made right.

Makes no difference how big your thirst is, a soda drawn from our fountain will quench it, and our ice cream soda has every element of superiority—that's the secret of its popularity.

## We Reach That Thirsty Spot

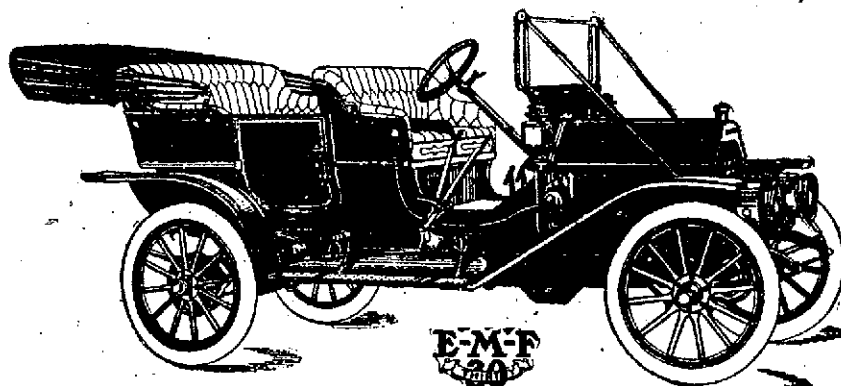

We pride ourselves on the service you receive here. It's an important item in our estimation, to wait on you promptly and quickly, and to give you what you want, so you need seek no further. It's making this store popular. That's why we are gaining friends daily. It's a pleasure to shop at Monroe's.

## Agricultural Department

(By W. R. McINTOSH.)

The appreciation in the price of raisins in the past few weeks seems to warrant the belief that the new crop will be fairly remunerative to the grower. Peaches have also advanced considerably.

These prices, if maintained, and advanced will put off the greater acreage to alfalfa in the orchard and vineyard districts of the San Joaquin, but the prices are not yet such as to demand new plantings of vines and trees on anything like a large scale.

The "new era" in this great valley is to be along the line of more alfalfa and more livestock.

I have, in former articles, referred to the association of the increase in alfalfa, hogs and cattle as constituting the great promise of the future. Another branch of livestock should be mentioned, where increased dairying is to be the "vogue." This is the increase of poultry on the ranches of the valley.

## FARMS OF THE IDEAL COUNTRY HOME.

The farms where the ideal farm family lives, a combination of the poultry and dairy business works well. The relative size of the two industries on the farm should depend upon the relative forces available for each.

The women of the family can do all except the heavy work connected with the poultry industry, while the men can look after the work connected with the dairy. This gives suitable employment for all members of the family, an employment which, under good management, ought to bring suitable rewards for labor.

An excellent illustration of this combined type of farm is described in detail in Farmers' Bulletin No. 375, issued by the United States Department of Agriculture, which gives an account of a dairy and poultry farm which has been highly successful.

In developing this combination of industries there will be found two problems which are practically identical in each of the subdivisions of the farm, i. e., feeding and breeding. Knowledge acquired concerning the principles involved in feeding cattle is directly applicable in feeding hens.

This is due to several points of resemblance between the productive cow and the productive hen. A cow not properly fed will not yield her maximum of milk, and a hen not properly fed will not produce a maximum of eggs.

In each case the character of the feed must be such as to encourage the product desired, rather than the laying on of flesh. In other words, the principles involved in balanced rations for hens are the same as those involved in balanced rations for cows, and while the character of the feed is different, the same kind of attention must be given in each case to see that the feed is adapted to the purpose which it is desired to accomplish.

Again, knowledge acquired concerning the effect of proper protection against the elements in the case of either the cow or the hen is applicable in the case of the other. In the matter of breeding there is a marked similarity in the principles involved. The type of cow to be sought is the one having a temperament which causes her to convert fat into a rather highly nitrogenous product, rather than into flesh, one that will consume a large amount of feed and convert it to product.

In the hen we want a type having a similar temperament, one that causes her to produce eggs, instead of putting on flesh, eggs, like milk, being a highly nitrogenous product.

The difficulties met with in breeding hens are greater than those met with in breeding cattle, though, on account of the short life of the former and the many generations that may be grown in a lifetime, this difficulty is largely overcome.

The reason why it is comparatively easy to breed up a herd of dairy cows is that farmers generally who keep their dairy cows are breeding them for dairy purposes, and it is comparatively easy to find new breeding stock which has been bred along the lines desired.

The main difficulties in the way are, first, that breeding stock is expensive; that not many generations can be raised in an ordinary lifetime, and that nearly all of the dairy breeds have, at various times, had certain requirements made of them that had no relation to their utility value.

For instance, Jersey breeders have been trying for solid color, Guernsey breeders have been giving a large amount of attention to the color of the skin, while in recent years there is a tendency to breed Holsteins for certain color characteristics.

Requirements of this kind are a distinct injury to a breed of dairy cows, for every requirement added decreases very markedly the number of animals meeting the utility requirements and these additional non-utility requirements.

In breeding poultry the main difficulty lies in the fact that so many pure-bred birds are of utility requirements and bred to suit the demand of the fancier.

Comparatively few chicken fanciers conduct a profitable business, and the farmer who is keeping poultry for utility purposes is frequently sadly disappointed when he buys high-priced eggs from the man who takes prizes at the poultry exhibitions.

While a few men have succeeded in securing high egg production with the fancy poultry required by the standards, the average man fails when he undertakes to do this.

It is greatly to be regretted that the poultry organizations of the country give so much attention to these points, which are of no value to the man who wants to make money out of eggs.

If poultry breeders generally centered their attention on egg production it would then be possible for the poultry raiser to get new blood of high value from any one of the large number of breeders.

**CHUL WHEAT AGAIN.** Recent reference has been made in these columns to Prof. Shaw's California experiments in cereal cultures, and especially of his famous Chul and Freter wheats, which promise so much for the farmers of the San Joaquin valley. The former is especially noteworthy. It has just received the endorsement of a very high authority.

Chul wheat, newly tried in this state after successful growing on the steppes of Russia without irrigation, has received praise from H. F. Blanchard, government agronomist, who formerly co-operated with the university in cereal experiments. Blanchard backed the praise which Prof. George W.

Shaw recently showered on the new grain and declared that Chul wheat has been very successfully raised in the San Joaquin valley.

Blanchard said of it: "In the fall of 1905 I received from the office of grain investigations a small lot of Chul wheat for experimental purposes in our co-operative work. Since then this variety has been grown at the several grain experiment stations in the state, where the results obtained are very favorable."

"At Modesto and Ceres we have grown white Australian alongside Chul wheat with the following results for three years:

three years:			
	Bushels per Acre.		
	1907	1908	1909
Chu) .....	18.6	63.5	53.3

"Chul produces from four to nine bushels more to the acre of a grain that makes more flour to the hundred pounds than Australian or club, and the flour produced makes bread equal to that made from Australian flour and better than that made from club flour. The Oakdale Milling company of Oakdale has made flour from Chul wheat, and a test indicates nearly twice as much wet gluten as from ordinary wheat grown in California. All tests show the Chul flour to be of excellent strength and quality."

"Chul wheat is a vigorous, upright grower. It may be seeded in November or as late as the last part of February and produce a good crop. The earlier seeding will usually give the best yield. It does not require as long a growing season as the Australian and club varieties, and will mature with less rainfall than the commonly grown varieties. It does not shatter."

A limited amount of Chul wheat may be obtained by making application to the College of Agriculture, Berkeley.

## MILK FOR POULTRY.

The Rural Spirit states that sweet skim milk is a very valuable food for a variety of young animals on the farm. It is most usually fed to calves and pigs, but it may be fed with equal, or greater, profit to chickens, both young and old.

Or, in the summer it is a very difficult matter to keep milk sweet for more than a few hours, but for feeding poultry sour milk is as good, if not better, than real sweet milk. It may become sour and curdled and fed with as good effect as when it is an hour old. It is easily digestible, and may be substituted for a part of the other food. It is especially valuable for young chicks in summer when they are growing, as it contains flesh and bone-forming material, and has enough water content to properly regulate the digestive organs. Also, being nitrogenous, it is good for laying hens, but it is best to use it as a mixture with ground grains.

Skim milk for all kinds of chickens is a comparatively safe feed. They can be given all they will drink, yet it is not best to let it stand in drinking vessels where young chickens have access to it, as they are liable to get into it and make it unwholesome. It should be fed to young chickens with more care than to old hens.

## THE CARE OF MILK.

When we remember that about 87 per cent of milk is water, it appears that more thought and care would be given in providing the right kind of water for the dairy cow. Too many farmers, says G. M. Lambers, are following the practice of letting their cows go to small, dirty ponds in the pasture. In a recent investigation, the writer found that over 50 per cent of the cattle on the farms visited, obtained their drinking water in this manner. At the present time many inquiries are being made by the farmers, who are asking why their milk is stringy and will not churn. In almost every case it was found that the cows were going to a small pond for their water.

The cows should not be obliged to depend on pond water. The stagnant, muddy ponds are a very common nuisance and often a source of disease. If it is necessary to depend upon this source for a water supply, the pond should be fenced and a good trough arranged with a floating valve near. There is nothing that will taint a cow's milk more quickly than impure drinking water. Many forms of germs, especially those of diarrhoea and typhoid, have been traced to such sources. Good, pure water should be provided at all times, and if possible, the cows should be allowed to go to it at their pleasure.

Always keep in mind that the dairy cow is your working capital and guard her, protect her and care for her with the greatest of knowledge and kindness.

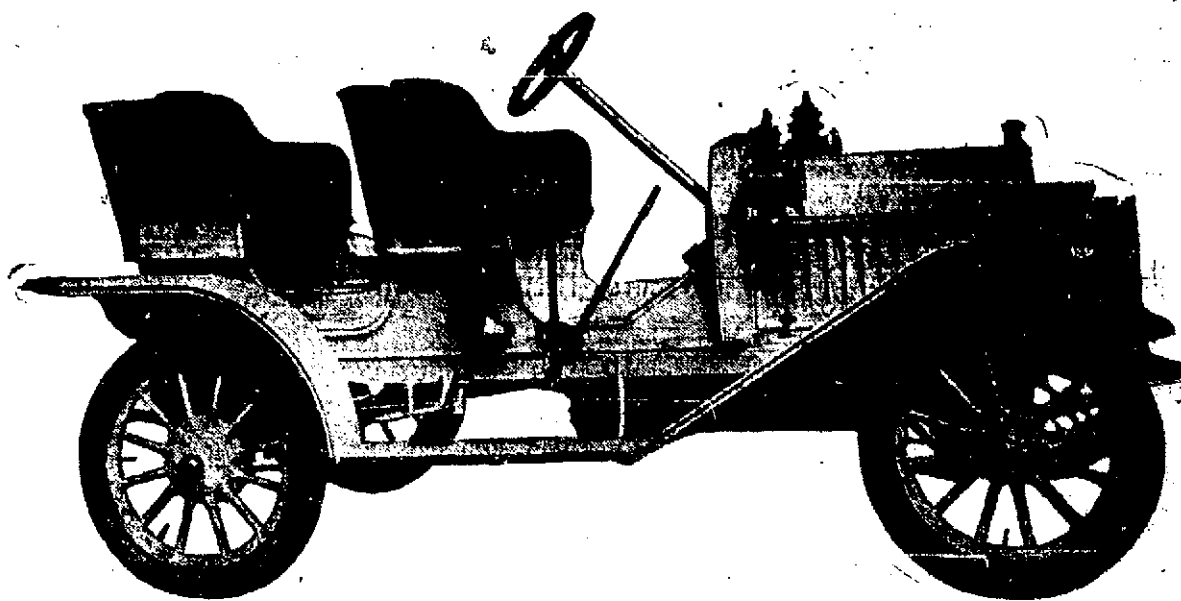

An eastern paper says that buttermilk has become a popular drink at the leading burros of New York. One of the principal hotels sells very near a thousand drinks of buttermilk daily at its bar; another hotel dispenses an average of fifty quarts a day; a number of cafes sell as much as three hundred to four hundred glasses of it in the course of a day's business.

To most people buttermilk is an agreeable drink. It cheers but does not inebriate. It satisfies thirst more effectively than anything that is to be had in the long list of soft drinks. In the country it has been a popular beverage from time immemorial, but in recent years that inclination has been attacked them savagely. They are the house cleaners of the human temperament, and absolutely refuse to dwell in peace with any sort of bacteria that are not members of their own immediate family. To their pugilistic propensities is ascribed one of the main reasons why buttermilk has come to be looked upon by men of medicine as a curative agent of importance.

As to the quality of the article that is handed out over bars, it compares poorly with the rich, lactic fluid which the farmer of twenty years ago fed to his pigs. The product of the farm was "thickly brewed" and was devoid of clunk or water or any of the modern adulterants. When cooled at the spring, or in the depths of a well, it was a drink fit for the gods of high Olympus, one who has quaffed it in its pristine purity can never forget its grateful and satisfying effect.

It has come to be esteemed in all great cities. Two decades ago the farmer found no appreciable outside demand for the product and fed the surplus to his hogs and poultry. He knew it to be a good thirst quencher for his harvest hands and an agreeable addition to his bill of fare, but he did not look upon it seriously as a source of income. Now the urban demand for it is large and constantly growing larger. Saloon men are selling it over the bar in all the leading cities, and physicians are recommending its use as an efficient aid to the treatment of many of the ills to which human flesh is heir.

Scientific investigation has shown that buttermilk is bountifully supplied with lactic bacilli. The lactic bacilli, while harmless to the human system, are deadly enemies to other forms of bacteria. They are aggressive and combative to a marked degree.

## BUICKS WIN!

## You Hear This Call at Every Contest

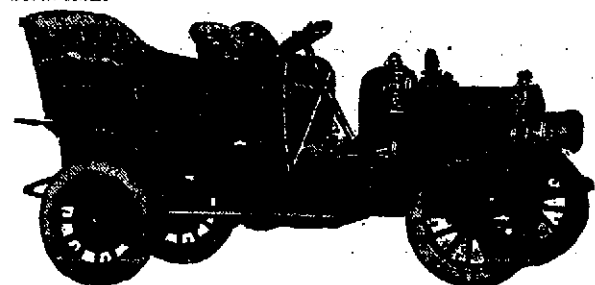

Buicks 'always win'! In every contest that the Buick enters, it carries off the honors easily. This has become such a recognized fact that **Buicks' Win Again** has become a byword amongst automobilists. The Buick has the speed, strength and endurance that has made it the winner and leader in the severest tests ever imposed upon a motor car, demonstrating emphatically that it has no equal in the automobile world today. It is the most practical and satisfactory car ever constructed, of its class, and should be seriously considered by any one intending to purchase an automobile.

No other automobile manufactured in the world today can claim as many glorious achievements as the Buick. In every class of race—speed, endurance tests, hill climbing, scaled bonnet contests—in fact, in every conceivable form of automobile racing, Buicks have proven their superiority.

There are many satisfied owners of Buicks in Fresno who have proven to their own satisfaction that no other car possesses so many advantages. Ride in a Buick, note how smoothly it glides along, note how it responds instantly to the slightest pressure on the steering wheel and brakes.

There is no danger of a Buick getting beyond your control. No danger of any of the parts failing to fulfill their obligations. They are put through the most severe tests before leaving the factory, assuring you of a car that will not fail you when you need it most.

Anyone contemplating the purchase of an automobile should not fail to investigate the BUICK—the car that has won more victories than any other car ever manufactured. It means the purchasing of the best that the money can buy and surely the best is none too good for you. The honors that have been piled upon the BUICK prove conclusively that the manufacturers have mastered every problem in perfect automobile construction.

## Some Recent Buick Victories

## Buffalo, July 24 &amp; 25th

BUFFALO, JULY 24th and 25th—The Buick entries simply outclassed the field, winning first in four of the five events entered and first and second in two events.

On the following Saturday the Buick won five of the six events entered and took first and second in three of them. Chevrolet also drove in a Buick, an exhibition mile in 55 2-5 seconds.

## Millwaukee, July 25th

MILWAUKEE, JULY 25th—The Model 19 Buick won the Milwaukee Sentinel \$1000 trophy, the first prize in the Wisconsin State Automobile Association's reliability contest. The Buick went through a hard six-days' run—brake test, motor test and clutch test, and finally a rigid technical test examination without a demerit. The cars beaten were Pope-Hartford—Franklin—2 Ramblers—Cadillac—3 Kissel Cars—Ford—Jackson—Johnson—Corbin—Pierce—Racine—Ohio—Badger—Marion—Mitchell—Reo 4 and Overland.

## JAPANESE "PROFS." SEEING U. S. FARMS

LOS ANGELES, Aug. 19.—Traveling as direct representatives of the Mikado, Professor H. Hara of the agricultural college, Imperial University at Tokyo, and N. Yamashita, president of the Oichi Polytechnic School, arrived in Los Angeles yesterday on the first stage of a trip across the United States, during which they will investigate American methods of farming. Accompanying the commissioners are representatives of private estates in Japan. The party has been in California a week and after visiting the orange groves of Southern California today will go to Texas, then East and through Europe.

**KNIVES INDIAN; SUICIDES.** MEHRILL, D. C., Aug. 19.—Following a quarrel today, "Bob" Patten, one of the best known cowboys in the district, slashed an Indian with a knife and then killed himself with a revolver. The tragedy occurred near the reservation at Quel Chena.

**MATHEMATICIAN DYING.** LEXINGTON, Ky., Aug. 19.—Dr. J. J. Rucker, one of the most distinguished educators in the South, is dying in Georgetown, Ky., according to advices from that town. Dr. Rucker, who is 52 years old, has been professor of mathematics at Georgetown College for fifty-three years.

**CALL OFF STRIKE.** CHICAGO, Aug. 19.—The Building Trades Council here tonight voted to call off the sympathetic strike on building mechanics, called out three weeks ago to aid striking elevator constructors in their warfare against the Otis Elevator Company. Four hundred men who have been idle will return to work.

**ARTICLES ARE OLD.** Through an inadvertence the articles of incorporation of the Riverdale Co-operative Creamery Association were reported as filed day before yesterday. The articles were filed a year ago, and were being copied day before yesterday for purposes of certification.

St., San Francisco.

## REALTY MEN LOOK FOR COLONIST RUSH HERE

Season Opens This Week; Everybody East Talking of Opportunities West.

### BUILDING STILL ON

\$6000 Sale Made in Poppy Colony; Lands Generally Quiet Now.

Two factors will figure in realty interest in real estate matters next month, according to past experience in realty circles. In the first place the property owners generally do not begin to return from their vacations in any large numbers until September. Secondly, then is the start of the colonist season.

### The Open Mouth

Often disclosed a bad set of teeth, which is always a drawback to you in any vocation you may follow. Ninety per cent of the dental work can be prevented. Why not see to your teeth at once?

Having had twelve years' experience, I am prepared to handle each case in an individual and successful way. I execute the only practical method of Alveolar Dentistry, also Natural Crowns, gold crowns, gold and porcelain inlays, platinum restorations, also guarantee to tighten loose teeth.

**Dr. C. E. Phillips**  
DENTIST  
LAND COMPANY BUILDING  
Rooms 201 and 202, 2nd Floor.

inaugurated to comply with the various of the Eastern colonists, who often elect to defer their departure for the West until the end of the season. In the past when the season ran for a solid month, there usually was a period of depression after the first rush of the season.

General predictions are that this year will be one of great real estate activity.

"GO WEST" FEVER.

"Every one in the east is talking of going West," remarked J. Q. Anderson, who returned recently from an extended Eastern trip. "The younger people are talking of coming here to locate, and their elders are planning to come West on visits."

"Particularizing, one of the biggest points of interest in the San Joaquin Valley is in its oil lands. Already, of course, much Eastern capital has been invested in such lands, and the interest is increasing."

"The agitation over the legislation by Congress has stimulated rather than checked this interest. It has created an impression that the value of the land already developed has increased in value. The hubbub of over production has been laid by the promise of conservation, and Easterners feel that the efforts of the government have made the land absolutely owned in California of higher value."

"There is of course considerable interest in other California lands. When a person decides to sell out in the East there are offers to buy in the prosperous portions of the East. Many in the East are making money and are seeking outlets for their capital. Naturally they seek to buy their neighbor's land adjoining their own."

"In large cities, such as New York, Washington, Boston, and other places on the Atlantic seaboard, as well as in cities in the Middle West, the general outlook is promising. Real estate is rising in value as a rule, and I believe that the rise is due to legitimate rather than speculative causes."

"Land in the West is surprisingly cheap compared to Eastern properties. That is one reason for the interest shown in California property. The high cost of living is still being discussed to some extent. The Easterners do not seem to think that living is much cheaper here, but they do understand that land is cheaper here."

**BUILDING ACTIVITY.**

Despite the summer quiet period, there is considerable activity in building circles. The new Radin and Kapin store is nearly completed. With its striking facade of white glazed brick, the structure adds greatly to the appearance of the business section in the vicinity of J and Tulare.

The steel structural work on the E. E. Attridge, black on Tulare street near M, has been nearly completed and construction will be pushed right along on the building.

At Tuolumne and I streets tomorrow ground will be broken for the magnificent new undertaking parlors of Stephens and Bean. Work on this structure also will be rushed.

The new Marichosa street home of Thomas Collins has been completed. The structure is a handsome addition to the residence buildings of the city. Work on the interior finishing of the new Republican building on K street near Tulare will be commenced in the near future. The structural work on the second story has been about completed.

**SALES REPORTED.**

Several good sized deals are reported for the week in local realty circles, both in suburban and urban property. All the deals in the city concern outlying districts. Pierce and Anderson report considerable activity in small lots, and some in alfalfa property. All of the offices state that interest is picking up and with the return of more property owners from vacation trips it is believed that next month will see considerable activity in land deals.

Among the larger deals is one involving the sale of twenty acres in Poppy Colony for \$6,000, reported by Stockton and Sparkman. The land

## PROJECTED POWER LINES REQUIRE 2 MILLION POUNDS WIRE

Operations of San Joaquin Co. to Provide for 350 Miles of Wire.

Kern Oil Fields to Receive Power Within 6 Months, Says Wishon.

"The San Joaquin Power Company is planning to hang some two million pounds of wire in its power lines," remarked A. G. Wishon, general manager of the company, who returned yesterday from a business trip to San Francisco. "The routes are just being mapped out. Our plans provide for some four hundred miles of wire, which will total about the weight mentioned."

"In six months we will have current supplied to the Midway and Sunset oil fields. The company is planning some active work in many places in the immediate future."

"There will be 350 miles of line added from the secondaries. We will build lines to Thickensfield, Minocopa, the Midway, and down the West Side from the new power plant in Crane valley."

"Men are working hard in the draughting rooms now on the steam auxiliary power plant at Bakersfield. The material for the plant has been ordered, and the construction of the building should be commenced within a week or ten days."

"Following this we will rush our power line to Merced. Then we will provide power for the Kings river quarry. We next will prepare to extend the power line from Merced falls to Exchequer to supply the rock crushing plant there. Steps will be taken as well to provide power for the Santa Fe rock crushing plant on the Kings river. Power will be supplied, before all our plans are completed, to the Kern county oil fields, by way of Bakersfield."

**ENGINEER HERE.**

E. L. Haines, electrical engineer in the San Francisco office of the J. J. White Company, the concern in charge of the construction of the new Crane Valley power plant, was in Fresno yesterday consulting with General Manager Wishon as to the best routes for the prospective power lines. A full set of estimates for the route is being made out.

was the property of J. A. Graham, the purchaser being Peter Van Wino.

Twenty acres on Blackstone brought \$5,000 in a deal reported by the same firm. The property, owned by W. J. Clark, was sold to J. E. Collins of Pueblo.

Five acres near Recreation park, in a deal reported by Stockton and Sparkman in which the parties to the transaction are not named, are said to have sold for \$2,700.

When you return from your vacation be sure you let the Bowen Dairy & Ice Cream Co. supply you with milk and cream. 1227 L St. Phone Main 673.

## FIREMAN IS HELD UNDER HEAVY BAIL

George Oldfield, Accused of Theft of Cigars From Burning Building, Formally Charged.

George Oldfield, a callman in the city fire department, who is accused of theft of several boxes of high-priced cigars from the fire department during a fire in that building a week ago, was arraigned before Police Judge Briggs yesterday morning. Oldfield was formally charged with burglary. The complaint was sworn to by L. Q. Blackett, steward in the Elks' club. The court fixed bail at \$10,000, the fault of which Oldfield was returned to jail. Judge Briggs will set the date of the preliminary examination later. Attorney T. D. Ingersoll has been retained by the accused through. Owing to the absence from court of Ingersoll yesterday, Oldfield did not enter a plea.

## HANFORD MAN, DIZZY WITH MONEY, LOCKED UP FOR HIS SAFETY

(Special to the Republican.)

ST. LEWIS, Aug. 20.—Dizzy, perhaps from the sight of twenty-dollar gold coins overflowing his pockets, Elijah H. Wilson, a fruit grower of Hanford, Cal., was locked up at the Central district police station last night for safe keeping. Another of his burdens was a wallet containing checks amounting to \$3,000.

Today, instead of a cloudy brain and empty pockets, Wilson happily possessed the reverse, and before leaving police headquarters' building, he thanked his hosts for the genuine hospitality.

Thursday night, William and Chad Wilson, brothers of Elijah, were prisoners of the police station, heavily laden with gold coins. They were allowed to go yesterday morning. When Elijah lost his brothers, he started out sightseeing. He was near Union station declaiming on the cheapness of paper and silver currency when the police found him.

## CUT AND BRUISED, BUT THINKS HE IS LUCKY

J. A. Kraft Has Thrilling Experience in Night Train Wreck.

J. Athel Kraft, a commercial traveler residing at 1449 K street, was one of the passengers in the chair car which was derailed near Park sixteen miles east of Coalinga, late Friday night, when the baggage car, a smoking car and a chair car on the Goheen-Coalinga local were derailed by a broken rail. There were numerous narrow escapes. Two ladies were carrying infants, but by crouching below the seats and holding tight, both they and the babies escaped. Mr. Kraft suffered the most severe injuries of any of the passengers. A deep gash in his upper arm required four stitches and serious trouble from his spine is feared as a result of the shock when he was flung through a window of the car. His head was badly cut, as was his right hand, and he also was cut on his left leg.

"The fact that the train was running on level ground was lucky for us," remarked Mr. Kraft last night. "As a matter of fact, however, the circumstances that the rails are laid flat on the ground without embankments is the reason that he partly the cause of the wreck. The track there has a reputation of being poorly laid."

"The engine or mail car broke the rail. They passed safely over the dangerous place, however, and only the baggage car, the smoker and the chair car were derailed. Fortunately, of course, there was no combustion down which they could fall. They simply slid off the rails and ties and plowed into the sand by the side of the track. They went so deep that they did not even fall completely over, lying at an angle. The passengers generally saved themselves by holding tight on to the seats."

"I was sitting near the window on the side opposite to where the car slid off the track. When the car went over I was flung over so quickly that I went head first through the window next to the ground. When I came to, for the shock made me senseless, I saw the car leaning over me. Everything happened as quickly as I don't remember much about the details of the running off the track. It was all over in a flash."

"We had plenty of medical and nursing attendance. There was almost no one hurt. The engine and combination mail and baggage car had stayed on the rails, excepting for the rear truck of the baggage car. The passengers were put on the baggage car and taken to Coalinga."

"The reports that had reached Coalinga were to the effect that there had been many killed and wounded, not unreasonably from the nature of the wreck and the cars derailed. We found out, and afterwards learned at the station, with surgeons in attendance. The stretchers, of course, were not needed, but everyone felt grateful for getting off so easily."

Miss Jones, also of Fresno, was a passenger on the train and suffered some minor bruises. Miss Nina Jones of Bakersfield lost several teeth and had several gashes on the lips and body.

## FORMER FRESNO MAN SUE FOR DIVORCE

Mrs. Wilson Madden, wife of Lieutenant Wilson E. Madden of the U. S. N. and formerly Miss Gladys Courvoisier of San Francisco, has been made the defendant in a suit for divorce filed in Oakland about a week ago by Lieutenant Madden. Mrs. Madden was a former Fresno girl and is well known in Fresno social circles. A description given as the cause for the action, according to San Francisco accounts.

The wedding of the couple followed a romance which had its inception when the Atlantic fleet was visiting in San Francisco. The young people met at a dance on board the battleship Maryland and the engagement was announced last January. Mrs. Madden states that she will not contest her husband's action.

## MRS. RUSTIGIAN DIES AFTER LONG ILLNESS

Brother Hurries Here From Constantinople to Be Present at Bedside.

Khach-Khatoun Rustigian, wife of B. M. Rustigian of this city, one of the best known and best established of Fresno's Armenian residents, passed away at her home here at 4:40 o'clock last night, after an illness of three years. A brother, H. Q. Zevlekian, well known as a former resident of Fresno, was in Constantinople at the time he learned first of his sister's illness. He hurried half way around the world and reached her bedside before the end came.

Mrs. Rustigian was born in Harpoon, Armenia, from which city her husband also came. She was married at the age of twenty, coming here twelve years ago, three years after Mr. Rustigian first came to make his home in Fresno, where he has since become one of the most prosperous ranchers about here.

The deceased leaves to mourn her, besides her husband, three children, a son, Alhnan, 16 years old; a daughter, Margaret, 10 years old, and a son, Hag, 4 years old, three brothers, and a niece and sister-in-law.

Both Mr. and Mrs. Rustigian came from well known and aristocratic families in Armenia, and have always figured as leaders of the local Armenian colony. Mrs. Rustigian was held in the highest esteem by her large circle of friends here, being known as a Christian, charitable and lovable woman.

Death was due to tumors, for which a number of operations were performed. The best doctors and treatment, however, failed to save her.

The details of the funeral have not been arranged. Before the remains were moved from the house last night a prayer meeting, at which a number of friends looked on, was held. The family was present, was held there.

Rustigian has assumed a leading place as a grower here, having only recently purchased a \$10,000 home in this city.

## POLICE WILL PRESS CHARGE OF ASSAULT

D. Espinosa, Who Refused Wine to Munez, Swears to Warrant.

D. Espinosa appeared before Police Judge Briggs yesterday morning and swore to a warrant against Pablo Munez, charging him with assault with a deadly weapon. With the phlegm of a formal charge against Munez, the police will press the case to the limit. Munez is the Italian who went on a rampage at a late hour Friday night at a house on D street. Drunk-crazed, the prisoner is alleged to have attempted to stab Espinosa and Patrolmen Helms and Knight with a butcher knife. The weapon has a heavy handle and a blade fourteen inches in length. The knife was as sharp as a razor. The knife is being held at police headquarters as evidence against Munez.

Munez, it is alleged, attempted to stab Espinosa because the latter would not supply him with "dago red." Pablo was already filled to the "brim" with wine, hence the refusal from Espinosa to give him an additional supply. Enraged, Munez whipped a butcher knife from his clothes, the story goes, and chased Espinosa a block. A hurry-up telephone call to police headquarters brought Patrolmen Helms and Knight to the scene. Standing on the porch of his home, Munez defied the officers. Helms drew his revolver and demanded that Munez drop the knife. Instead of complying, the intoxicated Italian leaped at Helms and tried to "carve" his heart. The blade of the knife passed under Helms' arm to the left of his heart. As the officer was about the pull the trigger, one of Munez's sons grabbed his father's arm. The Italian was overpowered and handcuffed.

Munez was brought before Police Judge Briggs yesterday morning, but no interpreter was present and the defendant was returned to jail. He is unable to speak English.

Munez will be remembered as the Italian who attempted to stab Officers Farren and Knight on the night of December 20, 1908. Last Christmas, Munez drew a knife on Patrolman Goehring in an alley near Engine House No. 3, Goehring fired at Munez, who dodged into the darkness and escaped.

**PARTNERSHIP FORMED.**

Two well-known diners have formed a partnership as to continue and enlarge the business hereafter run by M. McHugh. The new firm will be known as McHugh & Griffin. Both partners are old time Fresnoans and have had years of experience at the business. Their business will be located at 1254 K street. Tinning and sheet iron work can be done nowhere better than at McHugh & Griffin. Their prices will always be fair and right.

Have you tried it? We are getting lots of new trade. Why don't you start today. Bowen Dairy and Ice Cream Co., 1227 L St. Main 673.

## A Timely Word to Tenants

Of course you cannot choose any wall paper you like when the landlord limits you in price. This, however, does not prevent you from selecting artistic paper for your walls—properly suited to your rooms and furniture.

You will be satisfied at the artistic merit of the papers here that will not exceed your appropriation.

Jap-a-Lac here too, in great quantities.
